Foreword	IX
--------------------	----

CHAPTER 1

Preliminary	1
1.1 Sobolev Spaces and Their Basic Properties	1
1.1.1 Weak Derivatives and Their Properties	1
1.1.2 Sobolev Spaces	4
1.1.3 Some Properties of Sobolev Spaces	5
1.2 Some Inequalities in Analysis	12
1.2.1 The Young Inequality	12
1.2.2 The Poincaré Inequality	13
1.2.3 The Bellman–Gronwall Inequality	13
1.2.4 The Hölder Inequality	14
1.2.5 The Minkowski Inequality	15
1.2.6 The Jensen Inequality	15
1.2.7 The Shen–Zheng Inequality	16
1.2.8 The Interpolation Inequality	19
1.2.9 The Gagliardo–Nirenberg Interpolation Inequality	19
1.3 C_0 -Semigroup	20

CHAPTER 2

Global Existence and Exponential Stability of Spherically Symmetric Solutions to a Compressible Combustion Radiative and Reactive Gas	23
2.1 Introduction	23
2.2 Model and Main Results	24
2.2.1 Combustion Model of Radiative and Reactive Gas	24
2.2.2 Spherical Symmetry Model of Combustion Model	25
2.2.3 Main Theorems	28
2.3 Global Existence and Exponential Stability in $\mathcal{H}^1$	30
2.3.1 Global Existence of Solutions in $\mathcal{H}^1$	31
2.3.2 Exponential Stability of Solutions in $\mathcal{H}^1$	55

2.4	Global Existence and Exponential Stability in $\mathcal{H}^2$	67
2.4.1	Global Existence of Solutions in $\mathcal{H}^2$	67
2.4.2	Exponential Stability of Solutions in $\mathcal{H}^2$	74
2.5	Global Existence and Exponential Stability in $\mathcal{H}^4$	75
2.5.1	Global Existence of Solutions in $\mathcal{H}^4$	75
2.5.2	Exponential Stability of Solutions in $\mathcal{H}^4$	87
2.6	Bibliographic Comments	90

CHAPTER 3

Global Existence, Uniqueness and Exponential Stability of Solutions for the One-Dimensional Navier–Stokes Equations with Capillarity		93
3.1	Introduction	93
3.2	Model and Main Results	94
3.2.1	Korteweg-Type Model	94
3.2.2	Main Theorems	97
3.3	Global Existence and Exponential Stability in H_+^1	99
3.3.1	Global Existence in H_+^1	99
3.3.2	Asymptotic Behavior in H_+^1	114
3.3.3	Exponential Stability in H_+^1	120
3.4	Global Existence and Exponential Stability in H_+^2	122
3.4.1	Global Existence and Uniqueness in H_+^2	122
3.4.2	Exponential Stability in H_+^2	125
3.5	Global Existence and Exponential Stability in H_+^4	126
3.5.1	Global Existence in H_+^4	126
3.5.2	Asymptotic Behavior of Solutions in H_+^4	132
3.5.3	Exponential Stability in H_+^4	134
3.6	Bibliographic Comments	137

CHAPTER 4

Exponential Stability of Solutions for the Compressible p -th Power Newtonian Fluid with Large Initial Data		139
4.1	Introduction	139
4.2	Model and Main Results	140
4.3	Global Existence and Exponential Stability in H^1	143
4.3.1	Global Existence in H^1	143
4.3.2	Exponential Stability in H^1	162
4.4	Global Existence and Exponential Stability in H^2	163
4.5	Global Existence and Exponential Stability in H^4	165
4.6	Bibliographic Comments	166

CHAPTER 5

Global Existence and Asymptotic Behavior of Spherically Symmetric Solutions for the Multi-Dimensional Infrarelativistic Model	169
5.1 Introduction	169
5.2 Reformulation and Main Theorems	171
5.2.1 Reformulation of Model	171
5.2.2 Main Theorems	174
5.3 Global Existence and Asymptotic Behavior in $\mathcal{H}^1$	177
5.3.1 Global Existence in $\mathcal{H}^1$	177
5.3.2 Asymptotic Behavior in $\mathcal{H}^1$	196
5.4 Global Existence and Asymptotic Behavior in $\mathcal{H}^2$	201
5.4.1 Global Existence in $\mathcal{H}^2$	201
5.4.2 Asymptotic Behavior in $\mathcal{H}^2$	205
5.5 Global Existence and Asymptotic Behavior in $\mathcal{H}^4$	206
5.5.1 Global Existence in $\mathcal{H}^4$	206
5.5.2 Asymptotic Behavior in $\mathcal{H}^4$	219
5.6 Bibliographic Comments	221

CHAPTER 6

Global Existence and Asymptotic Behavior of Cylindrically Symmetric Solutions for the 3D Infrarelativistic Model with Radiation	223
6.1 Introduction	223
6.2 Reformation and Main Results	225
6.2.1 Reformation of Model	225
6.2.2 Main Theorems	228
6.3 Global Existence and Asymptotic Behavior in $\mathcal{H}^1$	229
6.3.1 Global Existence in $\mathcal{H}^1$	230
6.3.2 Asymptotic Behavior in $\mathcal{H}^1$	256
6.4 Global Existence and Asymptotic Behavior in $\mathcal{H}^2$	257
6.4.1 Global Existence in $\mathcal{H}^2$	257
6.4.2 Asymptotic Behavior in $\mathcal{H}^2$	260
6.5 Global Existence and Asymptotic Behavior in $\mathcal{H}^4$	261
6.5.1 Global Existence in $\mathcal{H}^4$	261
6.5.2 Asymptotic Behavior in $\mathcal{H}^4$	273
6.6 Bibliographic Comments	276
Bibliography	277
