Argumentation in Actual Practice

Argumentation in Context (AIC)

ISSN 1877-6884

This book series highlights the variety of argumentative practices that have become established in modern society by focusing on the study of context-dependent characteristics of argumentative discourse that vary according to the demands of the more or less institutionalized communicative activity type in which the discourse takes place. Examples of such activity types are parliamentary debates and political interviews, medical consultations and health brochures, legal annotations and judicial sentences, editorials and advertorials in newspapers, and scholarly reviews and essays.
