Luigia Camaioni (1947–2004)

We would like to dedicate this volume to Luigia Camaioni who passed away only few months after presenting her work on declarative and imperative pointing in infants at the workshop on Gestural Communication in Nonhuman and Human Primates from which this volume emerged.

We are inconsolable about losing a colleague devoted to science, with a broad interest in developmental psychology and an expertise in the nature of intentional communication in human infants. Her pioneering work contributed significantly to the understanding of communication in preverbal children and their use of gestures during early language acquisition. Her sudden, unexpected death leaves us missing her as a colleague and as a friend.
