About the Authors	IX
Introduction	1
<i>Katja Liebal, Cornelia Müller, and Simone Pika</i>	
<b>Part I: Evolution of language and the role of gestural communication</b>	<b>5</b>
The syntactic motor system	7
<i>Alice C. Roy and Michael A. Arbib</i>	
<b>Part II: Gestural communication in nonhuman primates</b>	<b>35</b>
The gestural communication of apes	37
<i>Simone Pika, Katja Liebal, Josep Call, and Michael Tomasello</i>	
Gestural communication in three species of macaques ( <i>Macaca mulatta</i> , <i>M. nemestrina</i> , <i>M. arctoides</i> ): Use of signals in relation to dominance and social context	53
<i>Dario Maestripietri</i>	
Multimodal concomitants of manual gesture by chimpanzees ( <i>Pan troglodytes</i> ): Influence of food size and distance	69
<i>David Leavens and William Hopkins</i>	
Requesting gestures in captive monkeys and apes: Conditioned responses or referential behaviours?	83
<i>Juan Carlos Gómez</i>	
Cross-fostered chimpanzees modulate signs of American Sign Language	97
<i>Valerie J. Chalcraft and R. Allen Gardner</i>	
<b>Part III: Gestural communication in human primates</b>	<b>121</b>
Human twelve-month-olds point cooperatively to share interest with and helpfully provide information for a communicative partner	123
<i>Ulf Liskowski</i>	

From action to language through gesture: A longitudinal perspective <i>Olga Capirci, Annarita Contaldo, M. Cristina Caselli, and Virginia Volterra</i>	141
The link (and differences) between deixis and symbols in children's early gestural-vocal system <i>Elena Pizzuto and Micaela Capobianco</i>	163
A cross-cultural comparison of communicative gestures in human infants during the transition to language <i>Joanna Blake, Grace Vitale, Patricia Osborne, and Esther Olshansky</i>	183
How does linguistic framing of events influence co-speech gestures? Insights from crosslinguistic variations and similarities <i>Asli Özyürek, Sotaro Kita, Shanley Allen, Reyhan Furman, and Amanda Brown</i>	199
The two faces of gesture: Language and thought <i>Susan Goldin-Meadow</i>	219
<b>Part IV: Future directions</b>	235
Gestures in human and nonhuman primates: Why we need a comparative view <i>Cornelia Müller</i>	237
<b>Book Review</b>	
Michael C. Corballis (2002). <i>From hand to mouth. The origins of language</i> . Princetown, Oxford: Princetown University Press. <i>Reviewed by Mary Copple</i>	261
Index	281

## About the Authors

**Shanley Allen, Ph.D.**, is an Associate Professor in the Program in Applied Linguistics and the School of Education at Boston University. Her research explores the first language acquisition of morphology and syntax, with a focus on comparing acquisition patterns across languages, as well as with children learning Inuktitut (Eskimo) in northern Canada. Her other interests include bilingual acquisition, specific language impairment, and the acquisition of co-speech gesture.

**Michael Anthony Arbib** was born in England, grew up in Australia and received his Ph.D. in Mathematics from MIT. After five years at Stanford, he became chairman of Computer and Information Science at the University of Massachusetts, Amherst in 1970. He moved to the University of Southern California in 1986, where he is Professor of Computer Science, Neuroscience, Biomedical Engineering, Electrical Engineering, and Psychology. The author or editor of 38 books, Arbib recently edited *From Action to Language via the Mirror System*. His current research focuses on brain mechanisms of visuomotor behavior, on neuroinformatics, and on the evolution of language.

**Joanna Blake** is a Professor Emeritus of Psychology at York University.

**Amanda Brown, Ph.D.** in Applied Linguistics from Boston University and the Max Planck Institute for Psycholinguistics, Nijmegen. Currently she is an Assistant Professor of Linguistics at Syracuse University. Her research investigates bilateral interactions between established and emerging language systems using analyses of speech and co-speech gestures in Japanese speakers of English.

**Josep Call, Ph.D.** in Psychology in 1997 from Emory University, Atlanta. Worked at the Yerkes Primate Center from 1991 to 1997. From 1997 to 1999 was a lecturer at the University of Liverpool. Since 1999 he is a research scientist at the Max Planck Institute for Evolutionary Anthropology and director of the Wolfgang Köhler Primate Research Center in Leipzig. His research interests focus on comparative cognition in the social and physical domains. He has published numerous research articles on primate social behavior and comparative cognition and a book *Primate Cognition* (w/M. Tomasello, Oxford University Press, 1997).
