Bilingualism, Language Development and Processing across the Lifespan

Bilingual Processing and Acquisition (BPA)

ISSN 2352-0531

Psycholinguistic and neurocognitive approaches to bilingualism/multilingualism and language acquisition continue to gain momentum and uncover valuable findings explaining how multiple languages are represented in and processed by the human mind. With these intensified scholarly efforts come thought-provoking inquiries, pioneering findings, and new research directions. The *Bilingual Processing and Acquisition* book series seeks to provide a unified home, unlike any other, for this enterprise by providing a single forum and home for the highest-quality monographs and collective volumes related to language processing issues among multilinguals and learners of non-native languages. These volumes are authoritative works in their areas and should not only interest researchers and scholars investigating psycholinguistic and neurocognitive approaches to bilingualism/multilingualism and language acquisition but also appeal to professional practitioners and advanced undergraduate and graduate students.
