Acknowledgment

The Conference on "Lexical Knowledge in the Organization of the Lexicon" was generously supported by a grant from the Deutsche Forschungsgemeinschaft and the State of Baden-Württemberg. Editing of the text and preparation of a camera-ready manuscript were performed with resources of the Department of Linguistics at the University of Konstanz and its DFG Research Group "Lexikon", aided by a special grant from the University of Konstanz.

Among the large number of persons to whom we are grateful for having invested their skills, time and patience in realizing this book, we especially want to thank Yola de Lusenet and E.F.K. Koerner, who kindly accepted this book for the CILT Series; Darcy Bruce Berry, who edited the texts of those contributors for whom English is a foreign language; and Andrea Koch, who did much of the technical work necessary in order to format the manuscripts and prepare them for the press.

The editors

Contents

Introduction ix

I Syntactic Aspects of Lexical Variation 1

Lexical and Nonlexical Noun Incorporation 3
Mark C. Baker

Extraction, Lexical Variation, and the Theory of Barriers 35
