## ACKNOWLEDGMENTS

This book is a further development of issues first explored in my Ph.D. dissertation (Simmons 1992). The support, help, suggestions, and guidance of many has continued from that time through the writing of the present volume. First in importance has been the support and patience of my wife Shu-lan and my daughter Brenna, who have courageously and generously accepted all of the inconvenience to family life that the research and writing has demanded. They stoically tolerated my long summer absences when I was in China doing the fieldwork for this study and liberally accommodated me the time needed to sort, analyze, and write when back home in the U.S. I wish here to express my deepest thanks to them both.

I also wish to express sincere and heartfelt appreciation to my teacher and mentor Jerry Norman for generously sharing his knowledge, guidance, support, and enthusiasm along all the paths of research I have followed since he first agreed to direct my dissertation. I also learned much, in private discussions and at conferences, about issues addressed in the present study from W. South Coblin and David Prager Branner, who also provided useful comments on the manuscript. I am grateful to them for the valuable intellectual stimulation and support they have provided me over the years. My warm thanks go as well to the manuscript referees, including Laurent Sagart, for their careful reading and many useful suggestions. I am grateful also for the assistance and advice of the editor of the *Current Issues in Linguistic Theory* series, E. F. K. Koerner, whose advice has been instrumental in bringing this manuscript into presentable shape.

Many people in China also provided critical assistance during the research for this study. Among them, I would like to extend special appreciation to Lii Rong (Li Rong) for his experienced guidance in the area of dialect fieldwork. In addition, many other faculty at the Institute of Linguistics at the Chinese Academy of Social Sciences in Beijing provided valuable input and support during my periods of research in China, including Liou Jian (Liu Jian), Jang Jennshing (Zhang Zhenxing), Jang Hueying (Zhang Huiying), Hour Jingi (Hou Jingyi), Hwang Sheuejen (Huang Xuezheng), Shyong Jenqhuei (Xiong Zhenghui), Heh Uei (He Wei), and Jenqjang Shanqfang (Zhengzhang Shangfang). During my periods of research in the Jiang-Hwai Mandarin and Northern Wu region, I received valuable advice and help from Luu Gwoyau (Lu Guoyao), Baw Mingwoei (Bao Mingwei), and Jou Chyun (Zhou Qun) in Nanjing, Fuh Gwotong (Fu Guotong)

in Harngjou, You Ruujye (You Rujie) in Shanqhae, Tsay Gwoluh (Cai Guolu) in Danyang, and Dar Yoanyih (Da Yuanyi) in Jennjiang.

I further want to express my deepest appreciation and sincere indebtedness to all of my linguistic informants in China. They are identified in Chapter 4 and Appendix 1 and their languages are represented in this volume. Without their unfailing patience and enthusiasm through hundreds of hours of interviews, this study would not have been possible.

The fieldwork in Harngjou was undertaken in 1988-'98 and made possible through the generous support of the U.S. Department of Education Fulbright-Hays Doctoral Dissertation Research Abroad Program and the National Program for Advanced Study and Research in China administered by the Committee for Scholarly Communication with the People's Republic of China. The fieldwork on the other dialects in this study was undertaken in China during the summers of 1995 and 1996 with the generous support of the National Program for Advanced Study and Research in China of the Committee for Scholarly Communication with China. I am extremely grateful for the support of these organizations. My work, and the present study, would have been impossible without it.

Of course, any errors, inaccuracies, shortcomings, or omissions that remain in these pages are entirely my own.

New Brunswick, New Jersey, June 21, 1999
