List of Figures

1	The representation of a clause in the "Categories" style	25
2	The representation of 'hypotaxis' in Halliday (1965/81)	28
3	A simplified model of any sign system	34
4	The main components of a systemic functional grammar	36
5	'Realization' as 'instantiation': the re-arrangement of Figure 4 that is demanded by Halliday's second position on the grammar	62
6	An analysis by Halliday with an integrating syntax	72
7	A Sydney Grammar representation of a simple clause	112
8	The main components required in a systemic functional grammar that provides for 'structure conflation'	125
9	Matthiessen & Bateman's "output structure of an example"	131
10	The Cardiff Grammar analysis of a simple clause	148
11	The realization operations in the Cardiff and Sydney Grammars	180
12	The relationships of logical form to semantics and syntax	210
13	The use of the concept of 'place' to handle 'raising' phenomena	225
14	Two notations for representing 'componence'	246
15	A 'box diagram' representation of componence (as used in *IFG*)	247
16	The notations for representing 'componence' and 'conflation'	250
17	The notation for representing 'filling' in drawn diagrams and in print	252
18	The notations for representing 'componence', 'conflation' and 'filling'	253
19	The notations for 'exponence' in drawn diagrams and in print	256
20	Variation in the depth of exponence of a quantifying determiner	257
21	The notations for 'componence, 'filling' conflation' and 'exponence'	260
22	The complete syntactic analysis of a text-sentence	260
23	The discontinuity of a quality group that fills a modifier	262
24	An example of complexity in the nominal group	266
25	The analysis of a sentence with an embedded clause	289
Appendix A: 1	A highly simplified system network for 'thing' in English	298
Appendix A: 2	Some simplified realization rules for the 'thing' in English	300
Appendix B:	The clause	305
Appendix B:	The nominal group, the prepositional group and the text	306
Appendix B:	The quality group, the quantity group and the genitive cluster	307
