PREFACE

This volume contains a selection of papers originally presented at the Twelfth Conference on New Ways of Analyzing Variation, held at the Centre de recherches mathématiques of the Université de Montréal on October 27-29, 1983. The thirty-three contributions appearing here (out of sixty-one read at the conference) have been anonymously refereed and in many cases extensively revised and updated.

Carmen Fontaine helped coordinate the editorial process, and Melanie Wodicka was responsible for most of the word-processing and participated in the design of this volume.
