Preface & Acknowledgements	xiii
Introduction	1
Chapter 1: From Movement to Sound	
The Sign-Emitting Activities and Nonactivities of the Human Body as a Communicator	13
1.1 The sign-emitting activities and nonactivities of the human body	13
1.2 The anatomical-articulatory possibilities of the human body and their relation to communicative sound	15
1.3 An inventory of visual and visual-audible movements	16
1.4 The sounds of self-adaptors and alter-adaptors and their communicative quality: when we hear our touching ourselves and being touched	25
1.5 The sounds of body-adaptors: interpersonal and intrapersonal dimensions	29
1.6 The sounds of object-adaptors: when things talk back to us	31
1.7 The sounds of object-mediated activities: audible body extensions	32
1.8 Mechanical, artifactual and environmental sounds as possible components of interaction	35
1.9 Functions, culture, ontogeny and segmentality of bodily audible movements	37
1.10 Conclusion	41
Notes	42
Chapter 2: The Anatomy and Physiology of Vocal-Narial Sound Production	
An Audible-Visual Approach to Language and Paralanguage	45
2.1 From external articulations and contacts to internal-external speech activities and related signs	45
2.2 The lungs and bronchi	50
2.3 The esophagus	52
2.4 The larynx	54

2.5	The pharynx	63
2.6	The oral cavity	67
2.6.1	The alveolar-palatal areas	67
2.6.2	The dental areas	70
2.6.3	The labial areas and the cheeks	73
2.6.4	The tongue	89
2.7	The mandible	99
2.8	The nasal cavities	103
2.9	The vowel sounds as degrees in tongue and lip position: sound and gesture	111
2.10	A note on secondary articulations	113
2.11	Conclusion	114
	Notes	114
	Appendix: Linguistic and paralinguistic transcription symbols	115

Chapter 3: Language-Paralanguage-Kinesics

The Basic Triple Structure of Communication in Face-To-Face Interaction		121
3.1	The progressive phonetic-visual approach to speech	121
3.2	The expressive limitations of spoken and written words	123
3.3	A brief introduction to language, paralanguage and kinesics	129
3.4	The intervening silences and stills as elements of the basic triple structure	135
3.5	Segmental and nonsegmental elements within the basic triple structure	137
3.6	A note on the redundancy vs. complementarity of segmental and non-segmental features of speech	139
3.7	Anthroposemiotic coherence and ontogenetic and social development of the structure language-paralanguage-kinesics	140
3.8	Language markers and identifiers as the closest paralinguistic and kinesic accompaniments to words	147
3.9	The ten different realizations of language, paralanguage and kinesics in discourse	150
3.10	Intrasystem, intersystem, and environmental/cultural interrelationships	153
3.11	The total conditioning background of paralanguage	156
3.12	The basic triple structure in full interaction, reduced interaction, non-interaction and environmental interaction	159
3.13	On the concept of usage	166
3.14	The joint transcription of language-paralanguage-kinesics in their total interactional context	167
3.15	Conclusion	171
	Notes	172

Chapter 4: Primary Qualities

The Speaker-Identifying Paralinguistic Features	175
4.1 The conditioning factors and classification of primary qualities	175
4.2 Timbre	177
4.3 Resonance	178
4.4 Loudness	179
4.5 Tempo	182
4.6 Pitch: level, range, registers and intervals	184
4.7 Intonation range	189
4.8 Syllabic duration	192
4.9 Rhythm	194
4.10 Conclusion	195
Notes	196
Appendix: Transcription symbols for paralinguistic primary qualities	196

Chapter 5: Qualifiers

The Many Voices of Interaction	199
5.1 Nature, classification and problems of voice types	199
5.2 Breathing control	202
5.3 Laryngeal control	203
5.4 Esophageal control	218
5.5 Pharyngeal control	219
5.6 Velopharyngeal control	221
5.7 Lingual control	227
5.8 Labial control	228
5.9 Mandibular control	229
5.10 Articulatory control	230
5.11 Articulatory tension control	233
5.12 Objectual control	233
5.13 Conclusion	235
Notes	242
Appendix: Transcription symbols for paralinguistic qualifiers	243

Chapter 6: Differentiators

The Eloquence of Emotional and Physiological Reactions	245
6.0 Introduction: the status of differentiators as a paralinguistic category and as components of interaction	245
6.1 Laughter	248
6.1.1 The needed research perspectives on laughter	248
6.1.2 The morphology of laughter as a paralinguistic-kinesic component of interaction	249

6.1.3	Toward a correct labelling and understanding of laughter types	261
6.1.4	Direction, control and eliciting situations	263
6.1.5	Categories of social laughter: A functional classification	266
6.1.6	A final note on laughter: historical and cultural perspectives	283
6.2	Crying	284
6.2.1	Crying as a research topic	284
6.2.2	The morphology of crying as a paralinguistic-kinesic or paralinguistic-kinesic-chemical component of interaction	286
6.2.3	The vocabulary for crying and the interpretation of labels	298
6.2.4	Direction, control, eliciting situations, and privacy invasion	300
6.2.5	Categories of crying: a functional classification	303
6.3	Shouting	316
6.3.1	Shouting as a research topic	316
6.3.2	The morphology of shouting as a paralinguistic or paralinguistic-kinesic behavior	317
6.3.3	The vocabulary for shouting	320
6.3.4	Direction, control and eliciting situations	321
6.3.5	Categories of shouting: a functional classification	323
6.4	Sighing and gasping	330
6.4.1	Sighing and gasping as paralinguistic activities	330
6.4.2	The morphology of sighing and gasping and their similarities and differences	331
6.4.3	The nature of sighing and gasping and their direction, control and eliciting situations	333
6.4.4	Categories of sighing and gasping: A Functional classification	334
6.5	Panting	341
6.5.1	Panting as a paralinguistic phenomenon	341
6.5.2	A functional classification of panting	342
6.6	Yawning	343
6.6.1	The nature and paralinguistic status of yawning	343
6.6.2	The morphology of yawning	344
6.6.3	A functional classification of yawning	346
6.7	Coughing and throat-clearing	346
6.7.1	Coughing and throat-clearing as paralinguistic activities	346
6.7.2	The morphology of coughing and throat-clearing	348
6.7.3	Nature, direction, control and eliciting situations	350
6.7.4	Categories of coughing and throat-clearing: a functional classification	351
6.8	Spitting	358
6.8.1	Spitting as a voluntary paralinguistic-kinesic behavior	358
6.8.2	The morphology of spitting	359
6.8.3	Nature, direction and eliciting situations	360
6.8.4	Categories of spitting: physiological and social functions	361
6.9	Belching	366
6.9.1	Belching as a paralinguistic behavior	366

6.9.2 The morphology of a belch	367
6.9.3 A functional classification of belching: physiological and social aspects	368
6.10 Hiccuping	370
6.10.1 Hiccuping as a paralinguistic behavior	370
6.10.2 The morphology of a hiccup	371
6.11 Sneezing	371
6.11.1 Sneezing as a paralinguistic behavior	371
6.11.2 The morphology of sneezing	372
6.11.3 Social sneezing and its associated behaviors: courtesy, superstition, religion	374
6.11 Conclusion	376
Note	376
Chapter 7: Alternants	
The Vocabulary Beyond the Dictionary	379
7.1 Nature, meaning, iconicity, and lexicality of alternants	379
7.2 The needed research perspectives on alternants	387
7.3 Identified and unidentified alternants: verbal and visual representation	389
7.4 The inconsistency of written forms and the ambiguity of labels	403
7.5 The paralanguage of comics: sounds made visible	407
7.6 Toward a classification of alternants	416
7.7 The paralinguistic and kinesic qualifiers of alternants	435
7.8 The paralanguage of animal calling as a topic of interdisciplinary paralinguistic research	443
7.9 The communicative status of random alternants	446
7.10 Conclusion	448
Notes	449
Conclusion	451
References	453
Literary References	463
List of Illustrations	467
Name Index	469
Subject Index	473
