Acknowledgements

This volume grew out of collaboration between researchers of the University of Amsterdam and Université Paris 8 in the context of a Van Gogh project subsidised by The Netherlands Organisation for Scientific Research (NWO) on the Dutch side, and ÉGIDE on the French side. Enoch O. Aboh and Anne Zribi-Hertz coordinated this two-year collaboration, during which members of these research teams joined forces in order to gain a better understanding of the morphosyntax of reiteration in natural languages, with a special focus on creoles. The chapters presented in this volume report on the results of this interaction. The coordinators of this project, and the editors of this volume, would like to thank all of our colleagues for their valuable contributions made during these two years. A special mention needs to be made of our colleague and friend Hans den Besten, who took an active part in the first part of this project but sadly died on the 19th of July 2010, and to whose memory we wish to dedicate this volume. We are grateful to NWO and ÉGIDE for subsidizing this project and to the reviewers for their suggestions. Finally, we would like to thank the editors of the Creole Language Library for their supportive collaboration.
