Epistemic Stance in Dialogue

Dialogue Studies (DS)

ISSN 1875-1792

Dialogue Studies takes the notion of dialogicity as central; it encompasses every type of language use, workaday, institutional and literary. By covering the whole range of language use, the growing field of dialogue studies comes close to pragmatics and studies in discourse or conversation. The concept of dialogicity, however, provides a clear methodological profile. The series aims to cross disciplinary boundaries and considers a genuinely inter-disciplinary approach necessary for addressing the complex phenomenon of dialogic language use. This peer reviewed series will include monographs, thematic collections of articles, and textbooks in the relevant areas.
