Gesturecraft

Gesture Studies (GS)

Gesture Studies aims to publish book-length publications on all aspects of gesture. These include, for instance, the relationship between gesture and speech; the role gesture may play in social interaction; gesture and cognition; the development of gesture in children; the processes by which spontaneously created gestures may become transformed into codified forms; the relationship between gesture and sign; biological studies of gesture, including the place of gesture in language evolution; and gesture in human-machine interaction. Volumes in this peer-reviewed series may be collected volumes, monographs, or reference books, in the English language.
