CHAPTER 1
Written Questionnaires in the wider linguistic context 1
1.1 Three basic types of language data and WQs 4
1.2 Data in traditional dialect geography 6
1.2.1 The Fieldworker Interview (FI) method 7
1.2.2 Wenker's Written Questionnaire (WWQ) method 10
1.3 Today's Written Questionnaire (WQ) methods 11
1.4 The organization of this Book 13

Part I. History & theory

CHAPTER 2
A history of written questionnaires in social dialectology 19
2.1 German-language pioneers 21
2.2 From Wenker's *Deutscher Sprachatlas* to Mitzka's *Wortatlas* 23
Advantages 25
2.3 Dutch and Flemish WQs 27
2.4 Early English language WQs in the US 28
2.4.1 A new beginning: Alva L. Davis' (1948) WQ Survey 30
2.4.2 Cassidy's and Allen's WQ studies 34
2.5 Scotland and *The Linguistic Atlas of Scotland* 36
2.6 WQs in Canada: A special case 38
2.6.1 Canadian beginnings 39
2.6.2 *Survey of Canadian English* (1972) 42
2.6.3 Other Canadian WQs 44

2.6.4 Dialect Topography of Canada (1991–2004) **45**
2.6.5 *North American Regional Vocabulary Survey* **46**
2.7 Other, more recent applications **48**
2.8 Chapter conclusion **51**

CHAPTER 3
A comparison of data collection methodologies **53**
3.1 Corpus linguistics and WQs: A methodological comparison **54**
3.1.1 Limited linguistic contexts: Problem #1 **55**
3.1.2 Low-frequency items: Problem #2 **57**
3.1.3 (Positive) Evidence and negative evidence: Problem #3 **59**
3.1.4 Documentation of social backgrounds: Problem #4 **60**
3.1.5 Corpora and WQs: A comparison **61**
Linguistic examples: Attested and reported **64**
3.2 Comparison of elicitation techniques: WQ and FI **65**
3.2.1 The *Linguistic Atlas of the Upper Midwest* (1947–1953; 1973–6) **65**
3.2.2 Allen's WQ and FI data: Chambers' selection **67**
3.2.3 Selecting the best test **68**
Testing the data for equivalence **70**
Allen's original assessment **71**
3.3 Comparison of elicitation techniques: Sociolinguistic interview and WQ **73**
3.3.1 The Observer's Paradox and WQs **74**
3.3.2 McDavid's test **76**
3.3.3 WQs and sociolinguistic interviews in Vancouver, Canada **77**
Low-back vowels **78**
Yod-dropping **82**
3.4 Chapter conclusion **86**

CHAPTER 4
Types of traditional WQ variables **87**
4.1 Lexis (vocabulary) **87**
4.1.1 A Canadianism is dying out: *chesterfield* **88**
The rise and fall of *chesterfield* **92**
4.1.2 A Canadianism is staying put: The case of *tap* **95**
4.1.3 A Canadianism is entering the scene: TAKE UP #9 **99**
Interpreting the data on TAKE UP #9 **102**
Tracing TAKE UP #9 in the Canadian Oxford **104**

4.2 Morphology **105**
Snuck as a global form? **107**
4.3 Syntax and usage **109**
4.3.1 *Different* from/than/to? **109**
4.3.2 *Between* you and me or I? **113**
The source of the confusion **114**
4.3.3 Telling time: 11:40 or twenty-to-twelve? **117**
4.4 Pronunciation: Phonemic variables **121**
4.4.1 Yod-dropping **122**
Yod-retention in *avenue*: An urban vs. rural split? **124**
4.4.2 Variation in lexical item *vase* **125**
4.5 Outlook **129**

CHAPTER 5
World Englishes, multilingualism and written questionnaires **131**
5.1 Canadian English and the multilingual speaker **133**
5.1.1 From monolingual to multilingual perspectives **134**
5.1.2 From the national to the transnational: The sociolinguistics of globalization **138**
A new kind of sociolinguistics? **139**
Local literary practices and WQs **141**
5.2 World Englishes, Global Englishes: Concepts **142**
5.3 WQ Elicitation in World English contexts **144**
5.3.1 Some problems of WQs in contact scenarios **150**
5.3.2 Conceptualizing space in dialect geography **152**
5.3.3 Select morphosyntactic features of World Englishes **153**
5.4 English as a Lingua Franca (ELF) **156**
5.4.1 Concepts **156**
5.4.2 Polling language teacher attitudes towards ELF **158**
Group identity, mutual intelligibility and ELF **161**
5.4.3 Linguistic error or innovation? The case for WQs **162**
5.4.4 Discovering variables and variants **164**
Lexical innovation **164**
Pragmatic innovation: Idiomaticity in ELF **166**
Some principles for variable detection **168**
5.5 Addendum: Global Englishes and expert WQs **171**
5.6 Chapter summary **173**

CHAPTER 6
WQ data and linguistic theory **175**
6.1 Real time and Apparent time **176**
6.1.1 Age-grading **178**
6.2 The S-curve of linguistic change **180**
6.2.1 The case of N/V+ing + N compounds **181**
6.3 Change from above, change from below: Social class **184**
6.4 Gender (sex) **185**
6.4.1 Principle 1: Stable situations: Women use the standard more than men **185**
6.4.2 Principle 2: Women use more standard forms in changes from above **187**
6.4.3 Principle 3: Women use more of the incoming variant in changes from below **188**
6.4.4 Indexing social meaning: Gender **189**
6.5 Border effects: Autonomy vs. heteronomy **191**
6.5.1 Insights from Dialect Topography **193**
A cross-border continuum: St. Stephen (New Brunswick) and Calais (Maine) **193**
Political borders as linguistic divides: *Shone* in Ontario and New York **196**
Heightened differences in immediate border regions **197**
6.5.2 Insights from NARVS: The North American lexical perspective **198**
6.6 Sociohistorical framework and explanations **200**
6.6.1 Canada's five major immigration waves **201**
6.6.2 Trudgill and Schneider: Two complementary approaches? **202**
Trudgill's (2004) New-dialect Formation Theory **203**
Schneider's (2007) Dynamic Model **205**
6.7 Indexing social meaning **208**
6.7.1 Three "waves" in sociolinguistics **209**
6.7.2 Yod-dropping in CanE as an indexical field **211**
6.8 Homogeneity and heterogeneity **214**
6.8.1 Homogenization on the national level **215**
Homogeneity & Standard Canadian English **216**
6.8.2 Homogenization on the continental level **216**
6.8.3 Heterogenization (diversification) **217**
6.9 Chapter summary **221**

Part II. Practice

CHAPTER 7
Questionnaire design and data collection **225**
7.1 Planning the questionnaire: Purpose & research question **226**
7.2 Structure of the questionnaire **227**
7.2.1 Questionnaire length **231**
7.2.2 Choice of medium: Paper or online? **233**
7.3 Question design **234**
Self-reporting and community-reporting **235**
7.3.1 Types of questions **236**
Closed-response items **237**
Checklists **237**
Multiple-Choice items: Binary (nominal) & categorical **238**
Rating scales **238**
Multiple-items scales in social dialectology **240**
Inter-related items **241**
Open-response items **243**
Mixed-response types **244**
7.3.2 From raw questions to questionnaire items **245**
7.3.3 Self-reporting linguistic behaviour **249**
Inventories vs. social correlations **249**
Socio-syntactic reformulations **250**
Magnitude Estimation Tasks and grammaticality judgements **251**
7.3.4 Self-reporting language attitudes and perceptions **252**
Language attitudes **252**
Perceptions **254**
7.3.5 Community-reporting of linguistic behaviour **258**
7.3.6 Mitigating prescriptive influence: Framing the questions **259**
The role of instructions **259**
Using informal language in the questionnaire **261**
Reliability **261**
Some tentative insights: How to ask and how better not **262**
Defining evaluative categories **265**
Harnessing a pedagogical phonetic alphabet for social dialectology? **266**
Order of stimuli and trial items **267**
Intuitive formatting & item ordering **267**

7.3.7 Piloting and revising the questionnaire **268**
7.3.8 Social background questions **269**
7.4 Population sampling **270**
7.4.1 Random or judgement sampling? **270**
7.4.2 A combined sampling method **273**
7.5 Chapter summary **274**

CHAPTER 8
Working with WQ data **275**
8.1 The Dialect Topography portal **275**
8.1.1 Dialect Topography questionnaire **277**
8.1.2 "View Results": One variable in one location **277**
8.1.3 View Results: Comparing two locations **280**
8.1.4 Tutorials **283**
8.2 Calculating social indices **284**
8.2.1 The Regionality Index (RI) **285**
Complex cases **290**
Applying the RI **291**
Adjusting the RI for multilingual respondents **291**
8.2.2 Language Use Index (LUI) **292**
8.2.3 Ethnic Orientation Index (EOI) **293**
8.2.4 Occupational Mobility Index (OMI) and Social Class (SC) **294**
8.3 Data-readying in Excel **296**
8.3.1 Importing DT data into Excel **296**
PC Users **298**
Text Import Wizard **299**
Mac Users **300**
8.3.2 Three basic Excel commands **302**
Principles of Excel **302**
COUNTIF and SUM **304**
Exercises on the file "GH (All) – q1-different" **307**
Multiple conditions: COUNTIFS **308**
Excel graphing tool **310**
More exercises on the file "GH (All) – q1-different" **311**
COUNTIFS with indices: RI **311**
Exercise with RIs **313**
8.3.3 Beyond manual commands: Pivot tables **313**
8.4 Chapter summary

CHAPTER 9
Statistical testing with R **319**
Downloading and installing R **320**
Descriptive & Analytical statistics **321**
9.1 Why use statistical tools? **321**
9.2 Preliminaries: Types of variables and forming a hypothesis **323**
9.2.1 Types of variables in traditional WQs **324**
9.2.2 Formulating a hypothesis **326**
9.3 Univariate analytical statistics **328**
9.3.1 One dependent variable **329**
9.3.2 One dependent variable, one independent variable **333**
9.3.3 Converting a categorical variable into an ordinal variable **335**
9.4 Multivariate Analysis with R **339**
9.4.1 Linear models: Hierarchical Configural Frequency Analysis **340**
9.4.2 (Non-linear) logistic regression modelling **346**
Importing "data frames" into R **348**
The case for data import checking: Two errors **349**
A first logistic regression with interactions **351**
When you get a "Warning message" **354**
Logistic regression modelling without interactions **355**
9.5 Chapter summary **359**

CHAPTER 10
Epilogue **361**
10.1 The revival of WQs in social dialectology **362**
10.2 WQs and linguistic variables **366**
10.3 Desiderata **369**
10.3.1 Guidelines for WQ design in social dialectology **369**
10.3.2 WQs, geographical space, and potential risks **370**
10.3.3 WQs and WQ-internal checks and controls **372**
10.4 WQs: The delayed method **373**
