This book is a revised version of my Ph D dissertation (Lakshmanan 1989) that was submitted to the University of Michigan at Ann Arbor. Thanks foremost to the Co-Chairs of my dissertation committee *Susan Gass* and *John Swales* and the two other members of my dissertation committee Marilyn Shatz and Madhav Deshpande for their invaluable advice and tremendous support throughout. I am indebted to Larry Selinker for the many invaluable discussions of the issues addressed in this book. I am grateful to Jürgen Weissenborn and Lydia White for their very helpful comments on the manuscript submitted for review.

The revisions to the manuscript were completed at the Department of Linguistics in Southern Illinois University at Carbondale. I am grateful to Paul Angelis, Chair of the Department of Linguistics and my colleagues in the department for their support and encouragement.

Several other individuals have contributed directly and indirectly to the shaping of this work from its incipient stages to its completion. In particular I thank:

Herlinda Cancino, Kenji Hakuta and John Schumann for making the data from the four child L2 subjects available for the study.

Renu Gupta for undertaking the mammoth task of photocopying numerous transcripts of the child L2 data and making them available to me.

John Warner and Jyothi Sarkar for their help with the analysis and interpretation of the statistical data.

Chang and James Lenze for their help with the graphics.

Sarah Briggs, Sharon Hilles, Nina Hyams, Carolyn Madden, K.P. Mohanan, and India Plough and Bill Rutherford for their very useful discussions.

Patsy Aldridge for her help in tracking down books and articles.

Takae Tsujioka for her tremendous help with the indexing and the formatting of the camera-ready version.

Cornelis Vaes and Lise Winer for their very helpful comments on the formatting of the camera-ready version.

My parents, sisters, brother and Piet Hein for their support and encouragement throughout.

The research reported here was partially funded by a Rackham Block Grant awarded by the Program in Linguistics at the University of Michigan.
