Acknowledgements

This book is a revised version of my doctoral dissertation (Allen, 1994a) which was submitted to the Department of Linguistics at McGill University.

Financial support for this research was gratefully received from the following agencies: Kativik School Board Research Committee, Social Sciences and Humanities Research Council of Canada, Association of Canadian Universities for Northern Studies, Fonds pour la formation de chercheurs et l'aide à la recherche, McGill University Max Bell Fellowship for Canadian and Northern Studies, McGill University Department of Native and Northern Education, and Government of Canada Northern Scientific Training Program.

In addition to generous research funding, the Kativik School Board provided both logistical and moral support. Doris Winkler, Dirk Vermeulen, the members of the Research Committee, the staff and students of the Cultivating Language and Thought course given by the Teacher Training Department, and the staff of Isummasaqvik School in Quaqtaq, Quebec deserve special thanks.

Many Inuit were involved in this research as subjects, consultants, transcribers and checkers of data. Thanks to the children and their families involved in this study for their patience and helpfulness, to the residents of Quaqtaq and especially the Ningiuruvik family for their hospitality, and to Pasha Annahatak, Louisa Angutigirk, Johnny Cookie, Mae Gordon, Elisapie Keatainak, Lucie Maniapik, Billy Nowkawalk, Johnny Nowra, Elisapee Okpik-Durocher, Vickie Okpik, Markusie Papigatuk, Maggie Qullialuk, Annie Tukkiapik, Simeonie Tukkiapik, and Robert Watt for their excellent work with the data. Special thanks to Betsy Annahatak who provided my first introduction to the Inuit life and language, and to Lizzie Ningiuruvik who guided the research in the community and offered many suggestions, opinions and discussions toward a much better result than would have occurred otherwise.

A special debt of gratitude is due to my thesis supervisor, Lydia White, and to my "informal co-supervisor", Martha Crago. Both have provided invaluable help and advice at various stages of the research. It is through Martha that I was introduced to this area of research, and to the Inuit communities and culture in which I subsequently worked.

The Department of Linguistics and the School of Communication Sciences and

Disorders at McGill University provided a home base for the gestation and initial preparation of this work. Thanks to the faculty, staff and students for excellent teaching, support, encouragement and advice. The Instructional Communications Center at McGill University, especially André Hammond, provided advice and maintenance for the video and audio equipment used in this research. Fred Wilkes of the School of Communication Sciences and Disorders provided invaluable help with data management. Several research assistants helped in preparing the data for analysis; thanks to John Bell, Stephanie Douglas, Loriann Lorch and Martha Trahey.

The Max-Planck-Institut für Psycholinguistik has been my base throughout much of the writing and revising of this work. Thanks especially to members of the Argument Structure Group for discussions which have ended up in various forms in this book, and to the Technical Group for computer support.

The analyses on which this book is based were done through use of the CLAN programs associated with the CHILDES Project. I thank Brian MacWhinney and Leonid Spektor for prompt assistance with these programs.

An earlier version of Chapter 3 was published as “Early passive acquisition in Inuktitut”, *Journal of Child Language*, 23, 129–155 (Allen & Crago, 1996).

Many people contributed to this book through discussions and comments concerning one or several chapters. These include Mark Baker, Melissa Bowerman, Penny Brown, Harald Clahsen, Martha Crago, Eve Danziger, Katherine Demuth, Ken Drozd, Alice Eriks-Brophy, Michael Fortescue, Debbie Hill, Wendy Hough-Eyamie, Angeliek van Hout, Sotaro Kita, Ingeborg Lasser, Steve Levinson, Mick Mallon, Dean Mellow, Marianne Mithun, Siobhan Moss, Eric Pederson, Diane Pesco, Susan Powers, Cliff Pye, Willem de Reuse, Tom Roeper, Ben Shaer, Jürgen Weissenborn, Lydia White, David Wilkins, David Wilman, and Tony Woodbury. Portions of this work were also enriched by critique from audiences at several universities (University of Arizona, University of Kansas, Lund University, University of Manitoba, Max-Planck-Institut für Psycholinguistik, McGill University, Universität Stuttgart, Vrije Universiteit (Amsterdam)) and conferences (Canadian Linguistic Association, International Conference on Infant Studies, Stanford Child Language Research Forum, Society for the Study of Indigenous Languages of the Americas, Third National Student Conference on Northern Studies).

Finally, unending thanks to my parents, Roy & Melba Allen, my sister and brother-in-law, Sarah & Marc Bercier, and my husband, James Anglin, all of whose love and support throughout the research for and writing of this book was invaluable.

This book is dedicated to my late grandmother, Marion Leucinda Verge, who always had faith in me and in my abilities, and who always knew (in spite of what the nurses believed) that I would write a book someday.

Aspects of Argument Structure Acquisition in Inuktitut received the 1995 Book Award from the Society for the Study of the Indigenous Languages of the Americas.
