This book is a revised version of my doctoral dissertation, completed at the Department of Linguistics at the University of California, Los Angeles, in January 1997.

During the research for this study and the preparation and revising of this manuscript, many people encouraged, supported and guided me and I am happy that I can express my gratitude to them here. First, and by far most importantly, I want to thank the chair of my thesis committee, Nina M. Hyams, who has been an inspirational mentor, advisor and friend to me from the moment I entered the graduate program at UCLA in 1991 until today. Furthermore, I am indebted to my committee members Hilda Koopman, Dominique Sportiche and Terri Au for their interest in my research and their advice.

For the collection of the data I spent several months in The Netherlands and in Italy, where I had many invaluable discussions with the following people about the design and the results of the experiments: Peter Coopmans, Teresa Guasti, Teun Hoekstra, Helen de Hoop, Irene Kraemer, Evelien Krikhaar, Andrea Moro, Ad Neeleman, Bill Philip, Paulien Rijkhoek, Hotze Rullmann, Jan Wouter Zwart. Furthermore, many thanks to my assistants Wenda Bergsma (The Netherlands) and Andrea Gualmini (Italy), who have been of enormous help in both the preparation and the actual execution of the experiments.

Of course this project would not have been possible without the cooperation of the children, their parents and the teachers of:

- the ‘Wilhelminaschool’ in Hilversum, The Netherlands;
- ‘Da e Duck’ in Utrecht;
- ‘Monkie’ in Utrecht;
- ‘Milano Due — Sud’ in Milan, Italy;
- ‘Rovagnasco’ in Rovagnasco, Italy;
- ‘Humpty Dumpty’ in Milan, Italy.

Besides being very cooperative, the teachers and directors of the schools were, without exception, all very friendly and interested and the children gave us some great laughs! Thank you very much!

As for the design of the experiments, I would also like to thank Stephen Crain and Rosalind Thornton for sharing with me their rich experience in the collection of experimental data. Furthermore, I am grateful to Ken Wexler who took the time to discuss my work with me.

This study was financially supported by the following grants:

- Doctoral Dissertation grant, National Science Foundation under Grant No. SBR 9526264;
- Fellowship from the ‘Stichting voor Taal, Spraak en Logica’ (Foundation for Language, Speech and Logic, The Netherlands);
- Lenart Fellowship (UCLA);
- Grant from Sigma Xi, The Scientific Research Society (USA)
- Grant from the ‘Fundatie van de Vrijvrouwe van Renswoude te ’s Gravenhage’ (The Netherlands);
- Grant from the ‘Hendrik Muller’s Vaderlandsch Fonds’ (The Netherlands);
- Dissertation Year Fellowship, UCLA.

I thank these agencies for making this study possible.

My neighbor and friend Jerry Eichler has been wonderful in helping me with the graphs at the last minute. Thank you so much, Jerry! Furthermore, this book would not have been possible without the love and support of my family and my friends in The Netherlands, the United States, Italy, and Israel.

Finally, I am grateful to my new colleagues Dorit Ben-Shalom, Arik Cohen, Tova Rapoport, Nomi Shir and Yishai Tobin, at Ben Gurion University of the Negev, Israel, for their critical comments and invaluable suggestions regarding the analysis and, more importantly, for becoming very supportive friends. *Todara!*
