CHAPTER 1

Introduction 1

- 1.1 Basic issues 1
 - 1.1.1 Research questions 1
 - 1.1.2 Continuity of prosodic structure development 2
 - 1.1.3 Child-adult differences in phonological forms 4
 - 1.1.4 Development in prosodic structure 6
- 1.2 Empirical domains of investigation 7
 - 1.2.1 Linguistic domains 7
 - 1.2.2 The language of investigation 8
- 1.3 Overview 8

CHAPTER 2

Phonological theory and prosodic acquisition 11

- 2.1 Introduction 11
- 2.2 Phonological background 11
 - 2.2.1 Prosodic theory 11
 - 2.2.1.1 The prosodic hierarchy 11
 - 2.2.1.2 Constituents in the hierarchy 12
 - 2.2.2 The prosodic structure of Japanese 16
 - 2.2.2.1 Syllables and moras 17
 - 2.2.2.2 Feet 19
 - 2.2.2.3 Prosodic words 20
 - 2.2.3 Optimality Theory 21
 - 2.2.3.1 Architecture of OT grammars 22
 - 2.2.3.2 Types of constraints and constraint interaction 23
- 2.3 Previous research on prosodic acquisition 27
 - 2.3.1 Representation of early words 27

2.3.1.1	Evidence for syllable structure	27
2.3.1.2	Evidence for moraic structure	28
2.3.1.3	Evidence for foot structure	30
2.3.2	Child-adult differences	32
2.3.2.1	Differences in syllable-internal structure	32
2.3.2.2	Differences in word-internal structure	34
2.3.2.3	Variability of child forms	38
2.3.3	Development of prosodic structure	40
2.3.3.1	Gradual access to the prosodic hierarchy	40
2.3.3.2	Parameter-setting account	41
2.3.3.3	Constraint-based account	43
2.4	Summary of previous research	45

CHAPTER 3

Methods

47

3.1	Introduction	47
3.2	Subjects	47
3.3	Collection method	49
3.4	Transcription and coding	50

CHAPTER 4

The representation of early syllable-internal structure

53

4.1	Introduction	53
4.2	Compensatory lengthening and moraic conservation	54
4.2.1	Moraic conservation	54
4.2.2	Excursus on length distinction	56
4.2.3	Compensatory lengthening in child Japanese	59
4.2.3.1	The predictions	59
4.2.3.2	Prosodic consequences of onset deletion	59
4.2.3.3	Prosodic consequences of coda deletion	61
4.2.3.4	Prosodic consequences of vowel deletion	63
4.2.3.5	Consonant lengthening	64
4.2.4	Comparisons with other child languages	66
4.2.5	Section summary	67
4.3	Bimoraic maximality	68
4.4	Sonority threshold on moraicity	71
4.4.1	Zec's (1988) generalization	71
4.4.2	Development of geminates in child Japanese	73

4.4.3 Sonority and Weight-by-Position	75
4.5 Conclusions	78

CHAPTER 5

The development of syllable-internal structure	79
5.1 Introduction	79
5.2 Child-adult differences in syllable-internal structure	79
5.2.1 Developmental stages in syllable-internal prosodic structure	79
5.2.1.1 Stage 1	80
5.2.1.2 Stage 2	83
5.2.1.3 Stage 3	86
5.2.1.4 Summary of developmental stages	88
5.2.2 Analysis of syllable-internal structure in child grammars	89
5.2.2.1 Relevant constraints	89
5.2.2.2 Ranking in adult Japanese	95
5.2.2.3 Ranking in Stage 1	99
5.2.2.4 Ranking in Stage 2	102
5.2.2.5 Ranking in Stage 3	110
5.2.2.6 Summary	114
5.3 Account of developmental patterns	115
5.3.1 Restrictions on constraint reranking	115
5.3.2 Individual differences	119
5.3.3 Mechanisms of reranking	122
5.4 Conclusions	127

CHAPTER 6

The representation of early word-internal structure	129
6.1 Introduction	129
6.2 Minimality condition in child language	130
6.2.1 Minimality effects as evidence for foot structure	130
6.2.2 Bimoraic minimality of truncated words	131
6.2.3 Lengthening of monomoraic targets	138
6.2.4 Summary	141
6.3 Templatic effects	142
6.3.1 Templatic effects as evidence for word-internal structure	142
6.3.2 Factoring out non-templatic causes of truncation	144
6.3.2.1 Vowel devoicing	145

6.3.2.2	Segment markedness	147
6.3.2.3	Accent and pitch	149
6.3.2.4	Syllable position	151
6.3.2.5	Summary	152
6.3.3	Disyllabic maximality	153
6.4	Conclusions	158

CHAPTER 7

The development of word-internal structure	159
7.1	Introduction 159
7.2	Developmental stages in word-internal structure 159
7.2.1	Monosyllabic stage 159
7.2.2	Stage 1: word = strictly binary foot 163
7.2.2.1	Output structures 163
7.2.2.2	Target→ Child form mapping 163
7.2.3	Stage 2: Beyond the minimal word 169
7.3	Analysis of word-internal structure in child grammars 171
7.3.1	Relevant constraints 171
7.3.2	Stage 1: the minimal word stage 172
7.3.2.1	Monomoraic target augmentation 172
7.3.2.2	Disyllabic maximality 172
7.3.2.3	The markedness of LH forms 173
7.3.3	Stage 2: Beyond the minimal word 175
7.3.3.1	The appearance of monomoraic outputs 175
7.3.3.2	The appearance of trisyllabic and longer outputs 175
7.4	Issues in the development of word-internal structure 177
7.4.1	Paths of constraint reranking 177
7.4.2	Continuing effects of markedness 179
7.5	Conclusions 184

CHAPTER 8

General conclusions and further directions	185
8.1	Conclusions 185
8.1.1	Continuity 185
8.1.2	Child-adult differences 186
8.1.3	Mechanisms of development 188
8.2	Further directions 189
