# TABLE OF CONTENTS

<i>Contents</i>	v
<i>Table of Figures</i>	ix
<b>Introduction</b>	<b>1</b>
<b>I. Is there rhythm in speech?</b>	<b>5</b>
1. The isochrony debate	5
2. Acoustic correlates of isochrony in speech	14
2.1 Perceptual centers	14
2.2 Determinants of P-centers	19
2.2.1 Syllable onset	19
2.2.2 Syllable rhyme	21
2.2.3 An algorithm for P-center location	21
3. Outlook for future isochrony research	22
3.1 The influence of tempo on P-center location	22
3.2 P-centers in polysyllabic feet	23
3.3 Permissible tolerance zones for perceptual isochrony	24
3.4 Isochrony and phrase boundaries	34
<b>II. Discovering rhythm in English speech</b>	<b>37</b>
1. Identifying isochrony auditorily	37
1.1 The nature and extent of isochrony	48
1.2 Links in isochronous chains	49
1.3 Alternative chains	50
1.4 Isochronous chains and intonation boundaries	51
1.5 Isochronous chains and speaker switches	52
1.6 Isochronous chains and parallel or discontinuous structures	52
1.7 Preliminary conclusions from the auditory analysis	53

2. Investigating perceptual isochrony acoustically	53
2.1 Instrumental determination of absolute interval duration	54
2.2 Measures of permissible and non-permissible variation	55
2.3 A comparison of isochronous and non-isochronous sequences	57
2.4 Two sets of problematic data	60
2.4.1 Perceptual isochrony despite significant temporal variability	61
2.4.2 Minimal temporal variability but perceptual non-isochrony	62
3. Rhythmic structures and their nature	65
3.1 Perceptual isochrony and the notion of gestalt	66
3.1.1 Gestalt properties and organizing principles	66
3.1.2 Speech rhythm gestalts	69
3.2 Silent beats in rhythmic structures	72
4. An auditory-acoustic rhythmic analysis of a fragment of conversational English	74
<b>III. The hierarchical organization of speech rhythm</b>	<b>79</b>
1. Metrical models of linguistic rhythm	79
2. Speech rhythm in relation to prosodic hierarchical structure	89
3. Tempo and the prosodic hierarchy	100
4. Metrical models of speech, music and verse compared	103
4.1 Generative theories of meter in music	103
4.2 Generative theories of meter in verse	107
4.3 Speech, music and verse as metrically governed activities	112
<b>IV. Analyzing speech rhythm at turn transitions</b>	<b>115</b>
1. Current views of timing in everyday interaction	116
1.1 'Unmarked next' position and transition spaces	117
1.2 Overlaps and interruptions	118
1.3 Pauses, gaps and lapses	121
1.4 Problems with the current view of timing	122
2. A rhythm-based metric for turn-taking	126
2.1 The unmarked case	126
2.2 The marked cases	127
2.2.1 Anticipated and early terminal onsets	128
2.2.2 Delayed and late terminal onsets	129
2.2.3 Pre-terminal onsets	129
2.3 Natural classes and degrees of markedness	130
3. Advantages of a rhythm-based view of timing	131

4. Empirical evidence for a rhythm-based view	132
4.1 Latching vs. transition space or micro-pause	144
4.2 Non-significant vs. significant pausing	148
4.3 Floor-competitive vs. non-floor-competitive overlap	152
<b>V. Accounting for speech rhythm at turn transitions</b>	<b>163</b>
1. Rhythm coordination as temporal congruence	164
2. Interactional rhythm as contextualization cue	167
3. A critical evaluation of current accounts	171
3.1 How are rhythmic beats recognized?	172
3.2 At what level is rhythm established?	173
3.3 Are all kinds of interaction equally rhythmic?	174
4. Speech rhythm as a function of conversational organization	175
4.1 The transition types illustrated	178
4.2 Loose junctures and rhythmic coordination	182
4.2.1 Interrupted sequences	182
4.2.2 Expansions of prior sequence	184
4.2.3 New activity sequences	186
4.2.4 Topical non-coherence	189
4.3 Tight junctures and rhythmic coordination	190
4.4 Conclusion	194
<b>VI. Interpreting speech rhythm at sequence-external junctures</b>	<b>197</b>
1. Rhythmic integration	197
2. Rhythmic non-integration	202
3. 'Pseudo' non-integration: silent beats	203
3.1 Silent beats as turn-taking 'passes'	205
3.2 Topic closing and topic shift	208
3.3 Relancing topical talk	214
4. Rhythmic integration revisited	217
<b>VII. Interpreting speech rhythm at sequence-internal junctures</b>	<b>221</b>
1. Speech rhythm in question sequences	222
2. Speech rhythm in non-question sequences	230
2.1 Greetings and other openings	230
2.2 Advice and requests	238
2.3 Assertions	241

2.4 Informings and news reports	246
2.5 Assessments, compliments and criticisms	248
3. Isochrony and preference/dispreference	254
3.1 Integrated but dispreferred turns	255
3.2 Delayed but preferred turns	260
3.3 Anticipated or early preferred and dispreferred turns	262
4. Conclusion	267
<b>VIII. Interpreting speech rhythm in specific activity sequences</b>	<b>269</b>
1. 'Genuine' questions	269
1.1 Rhythmic delay as a cue of embarrassment	269
1.2 Rhythmic delay and the need to reckon	272
2. Interactive repair	275
2.1 Tempo as a cue of interactive repair	277
2.2 Rhythm and the question of fault	284
2.2.1 The first move	284
2.2.2 The second move	288
2.2.3 The third move	293
2.2.4 The repair sequence as a whole	294
<b>Conclusion</b>	<b>297</b>
<i>Appendix I. Instrumental measurements of perceptually isochronous sequences</i>	299
<i>Appendix II. Instrumental measurements of perceptually non-isochronous sequences</i>	305
<i>Bibliography</i>	313
<i>Index of Authors and Subjects</i>	335
