List of figures

Figure 1. The dynamics central to the Dynamic Model (Buschfeld et al. 2014: 6) **22**

Figure 2. Cline of varieties in Schneider's (2003, 2007) Dynamic Model **42**

Figure 3. Typology of features in New Englishes **49**

Figure 4. The circular continuum of the narrow and broad approach to features **54**

Figure 5. The notion of verb-complementational profile (adapted from Mukherjee & Hoffmann 2006: 149) **62**

Figure 6. A partial taxonomic network of constructions (based on Trousdale 2008: 44) **88**

Figure 7. Fusion of the DITRANSITIVE construction with the verb send **94**

Figure 8. Fusion of the CAUSED-MOTION construction with the verb *sneeze* **95**

Figure 9. Extract of the CPA ontology **150**

Figure 10. The distribution of *make* across ASCs (%) in ICE-GB, with 95% confidence intervals **166**

Figure 11. The distribution of concrete and non-concrete uses of the CREATION construction in ICE-GB with 95% confidence intervals **170**

Figure 12. Distribution of the realization of the source in the CREATION construction in ICE-GB with 95% confidence intervals **170**

Figure 13. Distribution of the formal realization of the RP in the RESULTATIVE construction in ICE-GB with 95% confidence intervals **173**

Figure 14. The formal realization of the effect-slot in the CAUSATIVE construction with *make* in ICE-GB with 95% confidence intervals **176**

Figure 15. Distribution of the prepositions heading the goal PP of the CAUSED-MOTION construction in ICE-GB with 95% Confidence intervals **179**

Figure 16. Distribution of the realization patterns of the MOTION construction in ICE-GB with 95% confidence intervals **180**

Figure 17. Distribution of the realization patterns of the VERB-PARTICLE construction in ICE-GB with 95% confidence intervals **184**

Figure 18. LBCs by the numbers infographic **187**

Figure 19. *Make*-LBCs: number of LBC types per number of tokens in ICE-GB **191**

Figure 20. Extended association plot of semantic types in the subject slots of the AP RESULTATIVE and CAUSATIVE LBCs in ICE-GB **207**

Figure 21. Extended association plot of semantic types in the object slots of the AP RESULTATIVE and CAUSATIVE LBCs in ICE-GB **208**

Figure 22. Illustration of LBC with multiple inheritance from two ASCs **215**

Figure 23. Illustration of fusion between a LBC and ASC **217**

Figure 24. Illustration of LBC with multiple inheritance from two ASCs **222**

Figure 25. Illustration of LBC with multiple inheritance from two LBCs **223**

Figure 26. Illustration of LBCs with elided argument in the constructicon **224**

Figure 27. Illustration of an LBC with non-canonical pattern in the constructicon **225**

Figure 28. Instance links between LBCs of the CREATION ASC **226**

Figure 29. Instance links between LBCs of the CAUSATIVE ASC **227**

Figure 30. Instance (I) and Metaphor (M) links between LBCs of the CREATION ASC **228**

Figure 31. Network of Instance (I), Metaphor (M), and Subpart (S) links between ASCs (based on Goldberg 1995: 109) **229**

Figure 32. An overview of the *make*-constructicon **231**

Figure 33. Relative frequency of *make* per 100 lexical verb tokens in ICE-GB, ICE-HK, ICE-IND and ICE-SIN **242**

Figure 34. Relative frequency of *make* per mode in ICE-GB, ICE-HK, ICE-IND and ICE-SIN **244**

Figure 35. The distribution of *make* across ASCs (%) with 95% confidence intervals in ICE-GB, ICE-HK, ICE-IND and ICE-SIN **248**

Figure 36. Proportion of use of the allostructions of the *make*-CAUSATIVE construction with 95% confidence intervals in ICE-GB, ICE-HK, ICE-IND and ICE-SIN **268**

Figure 37. Effects plot of interaction between DETERMINER and NOUN NUMBER for the ICE-IND and ICE-GB comparison **283**

Figure 38. Effects plot of interaction between DETERMINER and NOUN NUMBER for the ICE-HK and ICE-GB comparison **283**

Figure 39. Effects plot of DETERMINER for the ICE-SIN and ICE-GB comparison **284**

Figure 40. Effects plot of PREMODIFICATION for the ICE-HK and ICE-GB comparison **286**

Figure 41. Effects plot of PP COMPLEMENT for the ICE-SIN and ICE-GB comparison **286**

Figure 42. Predicted cline of linguistic behavior following norm-orientation **299**

Figure 43. HCA of the collostructional profile of the LVC across ICE-GB, ICE-HK, ICE-IND, and ICE-SIN **303**

Figure 44. HCA of the collostructional profile of the LVC across ICE-GB, ICE-HK, ICE-IND, and ICE-SIN **303**

Figure 45. Predicted cline of linguistic behavior based on the cognitive representation of language **308**

Figure 46. Predicted cline of linguistic behavior based on cognitive representation of language **320**
