Acknowledgments

This book could never have been written without the support of several institutions and persons, which I am happy to acknowledge. Firstly, I would like to thank the *Deutsche Forschungsgemeinschaft* (DFG) for supporting major parts of the research reported in this book in project MO 1756/4-1, providing me with student research assistants and material expenses. My gratitude also goes to the University of Heidelberg for granting me a scholarship in the Olympia-Morata-Programme from 2012 to 2013 in order to complete my research project on binomials.

I would also like to thank my DFG-funded student research assistants, Katrin Petermann, Rebecca Reiß, and Michele Dressel, for all their work. The following colleagues in Heidelberg supported me morally and linguistically: Sonja Kleinke, Beatrix Busse, Stefanie Vogelbacher and Nadja Nesselhauf.

Finally, I share my joy in having completed this work with the people who matter most, Frieder, Julius, and Philine.
