Humour and Relevance

Topics in Humor Research (THR)

ISSN 2212-8999

The series aims to publish high-quality research on a broad range of topics in humor studies, including irony and laughter. Topics include, but are not limited to, pragmatics, the sociology of humor, the psychology of humor, translation studies, literary studies, and studies of visual humor combining word and image. Since humor research encompasses a variety of disciplines, we welcome theoretical and methodological approaches from any of these disciplines, thereby including the humanities, as well as the social and cognitive sciences. Examples include, among others, philosophy, anthropology, cultural studies, linguistics, media and communication studies, psychology, neuroscience, and computer science. Mutual intelligibility of studies across these various domains is a goal to be pursued within the series.

*To my mother.
She left us when I had just started writing this book.
But her lessons, her advice and the memories
of the time spent together will always remain vivid*
