Volumes in this series will be functionally and typologically oriented, covering specific topics in language by collecting together data from a wide variety of languages and language typologies. The orientation of the volumes will be substantive rather than formal, with the aim of investigating universals of human language via as broadly defined a data base as possible, leaning toward cross-linguistic, diachronic, developmental and live-discourse data. The series is, in spirit as well as in fact, a continuation of the tradition initiated by C. Li (*Word Order and Word Order Change*, *Subject and Topic*, *Mechanisms for Syntactic Change*) and continued by T. Givón (*Discourse and Syntax*) and P. Hopper (*Tense-Aspect: Between Semantics and Pragmatics*).
