

# Contents

Preface	v
1. Introduction: The Parasite's Lot in Evolutionary Biology	3
2. General Concepts	15
3. Non-Equilibrium Populations and Communities	44
4. Genetic Systems	76
5. Adaptive Radiation and Specificity	105
6. Ecological Niches, Species Packing, and Community Organization	134
7. Parasite Impact on the Evolutionary Biology of Hosts	149
8. Further Study	171
Bibliography	177
Author Index	227
Subject Index	233
