

Young Subjects

States, People, and the History of Social Change

Series editors Rosalind Crone and Heather Shore

The States, People, and the History of Social Change series brings together cutting-edge books written by academic historians on criminal justice, welfare, education, health, and other areas of social change and social policy. The ways in which states, governments, and local communities have responded to “social problems” can be seen across many different temporal and geographical contexts. From the early modern period to contemporary times, states have attempted to shape the lives of their inhabitants in important ways. Books in this series explore how groups and individuals have negotiated the use of state power and policy to regulate, change, control, or improve peoples’ lives and the consequences of these processes. The series welcomes international scholars whose research explores social policy (and its earlier equivalents) as well as other responses to social need, in historical perspective.

1 Writing the Lives of the English Poor, 1750s–1830s

Steven King

2 The People’s Health

Health Intervention and Delivery in Mao’s China, 1949–1983
