Kimberly R. Myers (Penn State College of Medicine)
Scott T. Smith (Penn State University)

Books in the Graphic Medicine series are inspired by a growing awareness of the value of comics as an important resource for communicating about a range of issues broadly termed "medical." For health care practitioners, patients, families, and caregivers dealing with illness and disability, graphic narrative enlightens complicated or difficult experience. For scholars in literary, cultural, and comics studies, the genre articulates a complex and powerful analysis of illness, medicine, and disability and a rethinking of the boundaries of "health." The series includes original comics from artists and non-artists alike, such as self-reflective "graphic pathographies" or comics used in medical training and education, as well as monographic studies and edited collections from scholars, practitioners, and medical educators.

## Other titles in the series:
