

Contents

<i>Foreword</i>	vii
INTRODUCTION	
A Difficult Theory	1
ONE	
The Speed of Light and Classical Physics	4
TWO	
Light and the Structure of Space-Time	24
THREE	
Toward a New Theory of Gravitation	58
FOUR	
Einstein's Principles	76
FIVE	
The Birth of General Relativity	103
SIX	
General Relativity: A Physical Geometry	138
SEVEN	
Relativity <i>Verified</i> : Mercury's Anomaly	149
EIGHT	
Relativity <i>Verified</i> : The Deflection of Light Rays	167
NINE	
Relativity <i>Verified</i> : The Line Shift	196
TEN	
The Crossing of the Desert	213
ELEVEN	
An Unpopular Theory	244
TWELVE	
The Rejection of Black Holes	255

CONTENTS

THIRTEEN

Paths in Schwarzschild's Space-Time 284

FOURTEEN

No Ordinary Stars 310

FIFTEEN

Gravitation, Astrophysics, and Cosmology 325

AFTERWORD

The Paths of General Relativity 346

Bibliography 349

Name Index 361
