

Contents

	Preface	ix
	Dedication and Acknowledgments	xv
1	Sexual Selection and Sperm Competition	1
	1.1 Sexual Selection	1
	1.2 Sexual Differences and the Evolution of Anisogamy	5
	1.3 Sperm Competition and Sexual Selection	10
	1.4 Summary	20
2	Sperm Utilization: Concepts, Patterns, and Processes	22
	2.1 Introduction	22
	2.2 Classification and Definition of Terms Used in the Sperm Competition Literature	23
	2.3 Quantifying Paternity	29
	2.4 Patterns of Sperm Utilization: An Overview	37
	2.5 Mechanisms	40
	2.6 Sperm Utilization and Multiple Mating	53
	2.7 Sperm Utilization in Natural Populations	55
	2.8 Mechanisms and the Potential for Selection	56
	2.9 Summary	60
3	Avoidance of Sperm Competition I: Morphological Adaptations	69
	3.1 Introduction	69
	3.2 Internal Fertilization	69
	3.3 Sperm Removal and Repositioning	70
	3.4 Alternative Explanations for Complex Genitalia	82
	3.5 Summary	89
4	Avoidance of Sperm Competition II: Physiological Adaptations	91
	4.1 Introduction	91
	4.2 Mating Plugs	97
	4.3 Seminal Products	114
	4.4 Pheromones	141
	4.5 Summary	142

5	Avoidance of Sperm	
	Competition III: Behavioral Adaptations	144
	5.1 Introduction	144
	5.2 Theoretical Models of Mate Guarding	146
	5.3 Evidence for Mate Guarding in Insects	149
	5.4 Alternative Hypotheses	168
	5.5 Adaptations for Efficient Guarding	179
	5.6 Male Mate Choice	183
	5.7 Summary	186
6	Copula Duration	198
	6.1 Introduction	198
	6.2 Sperm Displacement: Optimal Copula Duration in Dung Flies	202
	6.3 Copula Duration with Sperm Mixing	212
	6.4 Evidence Consistent with an Optimization of Copula Duration	213
	6.5 Female Influences	218
	6.6 Alternative Explanations	220
	6.7 Summary	221
7	Sperm in Competition I : Strategic Ejaculation	223
	7.1 Introduction	223
	7.2 Sperm Competition Games	227
	7.3 Cryptic Male Choice	245
	7.4 Cryptic Female Choice	247
	7.5 Summary	249
8	Sperm in Competition II : Sperm Morphology	250
	8.1 Introduction	250
	8.2 Sperm Size	252
	8.3 Sperm Polymorphism	263
	8.4 Intraejaculate Sperm Competition	274
	8.5 Summary	275
9	Ejaculate Manipulation: Mechanisms of Female Choice	277
	9.1 Introduction	277
	9.2 Influence over Remating	279
	9.3 Influence over Sperm Transfer	282
	9.4 Influence over Sperm Storage	288

	9.5 Sperm Selection	299
	9.6 Summary	317
10	Social Insects	319
	10.1 Introduction	319
	10.2 Multiple Mating and Multiple Paternity	320
	10.3 Social Consequences of Sperm Competition	325
	10.4 Alternative Hypotheses for Multiple Mating	334
	10.5 Summary	341
11	Broader Significance	349
	11.1 Sperm Competition and Sexual Selection	349
	11.2 Life History Evolution	350
	11.3 Speciation	354
	11.4 Concluding Remarks	356
	References	357
	Taxonomic Index	427
	Subject Index	432
