|------------------------------------------------------|----|------------------------------------------|-----|
| Preface                                              | 6  | Growth                                   | 60  |
| Acknowledgments                                      | 6  | Energetics                               | 62  |
| <b>Introduction</b>                                  |    | Gigantism                                | 67  |
| History of Discovery and Research                    | 9  | Hunting, Scavenging and Defense          | 68  |
| What Is a Predatory Dinosaur?                        | 15 | Eating Plants                            | 80  |
| Dating Predatory Dinosaurs                           | 18 | The Evolution—and Loss—of Avian Flight   | 81  |
| The Evolution of Predatory Dinosaurs and Their World | 19 | Mesozoic Oxygen                          | 85  |
| Extinction                                           | 29 | Predatory Dinosaur Safari                | 85  |
| After the Age of Avepod Dinosaurs                    | 32 | If Predatory Dinosaurs Had Survived      | 87  |
| Biology                                              | 33 | Predatory Dinosaur Conservation          | 88  |
| General Anatomy and Locomotion                       | 33 | Where Predatory Dinosaurs Are Found      | 89  |
| Skin, Feathers, and Color                            | 45 | Using the Group and Species Descriptions | 96  |
| Respiration and Circulation                          | 48 | <b>Group and Species Accounts</b>        |     |
| Digestive Tracts                                     | 51 | Predatory Dinosauriformes                | 103 |
| Senses                                               | 51 | Predatory Dinosaurs                      | 107 |
| Vocalization                                         | 52 | Theropods                                | 111 |
| Genetics                                             | 53 |                                          |     |
| Disease and Pathologies                              | 53 |                                          |     |
| Behavior                                             | 54 | Additional Reading                       | 248 |
| Brains, Nerves, and Intelligence                     | 54 | Index to Predatory Dinosaur Taxa         | 249 |
| Social Activities                                    | 55 | Index to Formations                      | 254 |
| Reproduction                                         | 56 |                                          |     |
