| 2.10 | <i>Papyrus Achmîm</i>                                        | 115 |
| 2.11 | Selection of Arithmetical Tables                             | 117 |
| 2.12 | Theon of Alexandria, <i>Commentary on Ptolemy's Almagest</i> | 124 |
| 2.13 | Archimedes, <i>Sand Reckoner</i>                             | 126 |
| 2.14 | Pappus, <i>Collection</i> , 2                                | 133 |
| 2.15 | <i>Greek Anthology</i>                                       | 137 |

### **Chapter 3. Euclid and the Beginnings of Theoretical Geometry**

141

|      |                                                                             |     |
|------|-----------------------------------------------------------------------------|-----|
| 3.1  | Plato, <i>Timaeus</i>                                                       | 142 |
| 3.2  | Plato, <i>Theaetetus</i>                                                    | 144 |
| 3.3  | Plato, <i>Meno</i>                                                          | 146 |
| 3.4  | Aristotle, <i>Physics</i>                                                   | 152 |
| 3.5  | Hippocrates, <i>Quadrature of Lunes</i>                                     | 155 |
| 3.6  | Archytas, <i>Two Mean Proportionals</i>                                     | 159 |
| 3.7  | Proclus, <i>Commentary on the First Book<br/>of Euclid's Elements</i>       | 161 |
| 3.8  | Euclid, <i>Elements</i> , 1, Including Commentary by Proclus                | 168 |
| 3.9  | Simplicius, <i>Commentary on Euclid's Elements</i>                          | 196 |
| 3.10 | Euclid, <i>Elements</i> , 2–6                                               | 200 |
| 3.11 | Euclid, <i>Data</i>                                                         | 229 |
| 3.12 | Euclid, <i>On Divisions</i>                                                 | 238 |
| 3.13 | Euclid, <i>Elements</i> , 10                                                | 242 |
| 3.14 | Pappus, <i>Commentary on Euclid's Elements, Book 10</i>                     | 248 |
| 3.15 | Euclid, <i>Elements</i> , 11–13                                             | 251 |
| 3.16 | Hypsicles, <i>Elements</i> , 14                                             | 265 |
| 3.17 | Pappus, <i>Collection</i> , 3, Problems and Theorems                        | 269 |
| 3.18 | Pappus, <i>Collection</i> , 3, Inscribing Polyhedra<br>in a Sphere          | 271 |
| 3.19 | Pappus, <i>Collection</i> , 4, Generalization of the<br>Pythagorean Theorem | 274 |

### **Chapter 4. Archimedes and Related Authors**

278

|     |                                               |     |
|-----|-----------------------------------------------|-----|
| 4.1 | Polybius, <i>The Histories</i>                | 279 |
| 4.2 | Archimedes, <i>Measurement of a Circle</i>    | 281 |
| 4.3 | Archimedes, <i>Quadrature of the Parabola</i> | 285 |
| 4.4 | Archimedes, <i>Sphere and Cylinder I</i>      | 293 |
| 4.5 | Archimedes, <i>Sphere and Cylinder II</i>     | 307 |
| 4.6 | Archimedes, <i>Planes in Equilibrium</i>      | 317 |
| 4.7 | Archimedes, <i>On Spirals</i>                 | 323 |
| 4.8 | Archimedes, <i>The Method</i>                 | 339 |
| 4.9 | Archimedes, <i>On Floating Bodies</i>         | 350 |

|      |                                                   |     |
|------|---------------------------------------------------|-----|
| 4.10 | <i>Carmen de Ponderibus et Mensuris</i>           | 354 |
| 4.11 | Pappus, <i>Collection</i> , 4, Spiral Area        | 356 |
| 4.12 | Pappus, <i>Collection</i> , 4, Touching Circles   | 357 |
| 4.13 | Pappus, <i>Collection</i> , 5, Archimedean Solids | 358 |

## **Chapter 5. Apollonius and Other Responses to Archimedes**

|      |                                                                                |     |
|------|--------------------------------------------------------------------------------|-----|
|      |                                                                                | 363 |
| 5.1  | Apollonius, <i>Conics</i> , 1                                                  | 363 |
| 5.2  | Apollonius, <i>Conics</i> , 2–4                                                | 390 |
| 5.3  | Apollonius, <i>Conics</i> , 5–7                                                | 423 |
| 5.4  | Apollonius, <i>On Cutting Off a Ratio</i>                                      | 450 |
| 5.5  | Nicomedes, <i>On the Conchoid</i> (from Eutocius)                              | 453 |
| 5.6  | Pappus, <i>Collection</i> , 4, Quadratrix                                      | 457 |
| 5.7  | Diocles, <i>On Burning Mirrors</i>                                             | 459 |
| 5.8  | Pappus, <i>Collection</i> , 5, Hexagonal Form of Honeycombs                    | 467 |
| 5.9  | Zenodorus, <i>On Isoperimetric Figures</i>                                     | 469 |
| 5.10 | Pappus, <i>Collection</i> , 4, Kinds of Geometrical Research                   | 471 |
| 5.11 | Pappus, <i>Collection</i> , 4, Angle Trisection                                | 472 |
| 5.12 | Pappus, <i>Collection</i> , 7, Analysis and Synthesis                          | 476 |
| 5.13 | Pappus, <i>Collection</i> , 7, Three- and Four-Line Locus and Guldin's Theorem | 477 |
| 5.14 | Pappus, <i>Collection</i> , 7, Constructing Conics using Focus and Directrix   | 479 |
| 5.15 | Serenus, <i>On the Section of a Cylinder</i>                                   | 484 |

## **Chapter 6. Applied Geometry**

|      |                                       |     |
|------|---------------------------------------|-----|
|      |                                       | 491 |
| 6.1  | Philo of Byzantium, <i>Belopoeika</i> | 491 |
| 6.2  | Heron, <i>Belopoeika</i>              | 493 |
| 6.3  | Heron, <i>Metrica</i>                 | 496 |
| 6.4  | Babylonian Tablet BM 34568            | 514 |
| 6.5  | <i>Papyrus Cairo</i>                  | 517 |
| 6.6  | Columella, <i>Of Husbandry</i>        | 520 |
| 6.7  | <i>Ayer Papyrus</i>                   | 523 |
| 6.8  | <i>Papyrus Rainer</i>                 | 527 |
| 6.9  | <i>Papyrus Genevensis</i>             | 529 |
| 6.10 | <i>Papyrus Cornell</i>                | 530 |
| 6.11 | <i>Papyrus Mathematics</i>            | 531 |
| 6.12 | <i>Corpus Agrimensorum Romanorum</i>  | 533 |
| 6.13 | Polybius, <i>The Histories</i>        | 537 |
| 6.14 | Vitruvius, <i>On Architecture</i>     | 540 |

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| <b>Chapter 7. Astronomy</b>                                            | 548 |
| 7.1 Eudoxus of Cnidus (from Aristotle and Simplicius)                  | 549 |
| 7.2 Aristarchus, <i>On the Sizes and Distances of the Sun and Moon</i> | 552 |
| 7.3 Hypsicles, <i>Little Work on Rising Times</i>                      | 558 |
| 7.4 Theodosius, <i>Sphaerica</i>                                       | 562 |
| 7.5 Menelaus, <i>Sphaerica</i>                                         | 572 |
| 7.6 Ptolemy, <i>Almagest</i>                                           | 580 |
| 7.7 Ptolemy, <i>Handy Tables</i>                                       | 598 |
| 7.8 Ptolemy, <i>Planisphere</i>                                        | 601 |
| 7.9 Ptolemy, <i>Geography</i>                                          | 607 |
| 7.10 Antikythera Mechanism                                             | 615 |
| 7.11 Cleomedes, <i>On the Circular Motion of Heavenly Bodies</i>       | 623 |
| 7.12 A Hellenistic Horoscope                                           | 626 |
| 7.13 Oxyrhynchus Astronomical Papyri                                   | 629 |
| 7.14 A Parapegma from Miletus                                          | 630 |
| <b>Chapter 8. Music</b>                                                | 635 |
| 8.1 Plato and Aristotle on Music Theory                                | 636 |
| 8.2 Archytas, from Porphyry and Ptolemy                                | 638 |
| 8.3 Aristoxenus, <i>Elementa Harmonica</i>                             | 640 |
| 8.4 Euclid, <i>Sectio Canonis</i>                                      | 640 |
| 8.5 Nicomachus, <i>The Manual of Harmonics</i>                         | 647 |
| 8.6 Theon of Smyrna, <i>Mathematics Useful for Reading Plato</i>       | 651 |
| 8.7 Ptolemy, <i>Harmonics</i>                                          | 652 |
| 8.8 Boethius, <i>Fundamentals of Music</i>                             | 660 |
| <b>Chapter 9. Optics</b>                                               | 671 |
| 9.1 Euclid, <i>Optics</i>                                              | 671 |
| 9.2 (Pseudo-[?])Euclid, <i>Catoptrics</i>                              | 682 |
| 9.3 Heron, <i>Catoptrics</i>                                           | 684 |
| 9.4 Ptolemy, <i>Optics</i>                                             | 685 |
| <i>Bibliography</i>                                                    | 695 |
| <i>Index</i>                                                           | 701 |
