

ACKNOWLEDGMENTS

The work on this annotated bibliography was facilitated by persons without whose assistance its completion would not have been realized. We extend to the following individuals and agencies our appreciation for the contributions they have made.

Essential ongoing reference support critical to this project was provided by the U.S. Geological Survey in Reston: Carmen O'Neill and Harry Allan (reference) located all references requested that were published outside Hawaii; Barbara Chappell (head librarian), supported their work, and Lee Regan (gifts and exchange), sent original copies of rare references on Hawaii. Additional U.S. Geological Survey support was provided by Jacqueline Freeberg (acting head librarian) and Ellen White and Anna Tellez (reference), Menlo Park Library. References published in Hawaii were obtained through the cooperation of the following librarians: Ken Herrick and Pat Okamura (head and assistant head librarians, respectively), Coreen Ishimaru and Ruby Matsumoto (reference), University of Hawaii at Hilo Library; Eleanor Au (head librarian), Patrick McNally, Michaelyn Chou, Karen Peacock, Nancy Morris, and James Cartwright (reference), Hawaiian and Pacific Collections, Thomas H. Hamilton Library, University of Hawaii at Manoa; Angela Lee, Bernice Pauahi Bishop Museum; Barbara Dunn, Hawaiian Historical Society; Lela Goodell, Hawaiian Mission Children's Society Library; and Richard Thompson, Hawaii State Archives.

Assistance with illustrations was provided by Betty Kam (photo librarian), Bishop Museum; the Reprography Department, Hamilton Library; David Rick, publisher of *The Early Mapping of Hawaii*; and Jim Griggs, photographer, Hawaiian Volcano Observatory (HVO).

Assistance with the German translation was given by Nora Tarnberg, U.S. Geological Survey Library at Reston, and assistance with the Dutch and Spanish by Asta Miklius, HVO. We are indebted to Sigrid Southworth for the Perrey references to Hawaiian seismic activity, obtained from the Bibliotheque Nationale in Paris.

Dedicated computer support was given by Wil Tanigawa and Tom English, HVO, and by Pat Doherty, Information Systems Division, Menlo Park. In particular, Doherty wrote, and Wil Tanigawa modified and implemented, a program to change reference numbers in the index to match changing reference numbers in the bibliography.

Acknowledgments

Darcy Bevens did dedicated searches on serials, edited the annotations twice over, and reviewed the essay. (Her trenchant comments deserve a book of their own.)

Robin Sutton and Jon Tokuuke helped with word processing and filing, and Lureen Helliangao assisted with the layout of the illustration sections.

We thank our colleagues in the U.S. Geological Survey Bob Jachens, Paul Greenland (retired), Jerry Eaton, and Rosalind Helz for evaluating references in their field of specialty. We also thank reviewers John Lockwood, Robin Holcomb, Robert Christiansen, and Christina Heliker for their insightful comments on the essay. John and Robin also provided reference material from their own collections and shared with us their intimate knowledge of Hawaiian history. Tom Simkin and Dick Fiske of the Department of Mineral Sciences, Smithsonian Institution, also made helpful comments on the index and essay.

We acknowledge the following for permission to reproduce illustrative material: Bishop Museum, Lyman Museum, Editions Limited (*The Early Mapping of Hawaii*), Kline Geology Laboratory at Yale University (*American Journal of Science*), and The University of Chicago Press (*Journal of Geology*).

Our final thanks go to the University of Hawaii Press for assistance in the preparation of this volume.
