

LIST OF TABLES

2.1 Substances ingested in pica	32
5.1 Overview of potential benefits and negative consequences of geophagia	71
6.1 Zinc deficiency in micro-organisms, plants and animals	82
7.1 Soil descriptions	93
7.2 Total concentration (mg kg ⁻¹ air-dried soil mass) of calcium, iron and zinc in the geophagic soils (after Hooda <i>et al.</i> 2002)	93
11.1 Unusual food procurement techniques	135
11.2 Deliberate consumption of unfamiliar animal foods	136
11.3 Deliberate consumption of unfamiliar plant foods	137
14.1 Number of insect species eaten by humans in different continents (after Hinz 2001)	165
14.2 Number of insect species (listed by order) eaten by humans worldwide (after Hinz 2001)	165
14.3 Animal food (in g) collected by Eipo women and girls (samples taken on various days)	169
14.4 Insects in Eipo nutrition (after Blum 1979)	170
14.5 Analysis of some animal food collected by Eipo women and girls (Bertling Laboratory, Solingen, Germany)	171
15.1 The usual composition of nasal mucus	182
