

**The Essays and Articles of Alfred North Whitehead,
1886–1916**

The Edinburgh Critical Edition of the Complete Works of Alfred North Whitehead

General Editor: Brian G. Henning, Gonzaga University

Executive Editor: Joseph Petek, Gonzaga University

*The complete, collected critical edition of the unpublished and published manuscripts of
British-American philosopher Alfred North Whitehead*

This Critical Edition brings together for the first time, in a series of critically edited volumes, the complete, collected published works and previously unpublished lectures, papers and correspondence of Alfred North Whitehead, one of the 20th century's most original and significant philosophers.

Newly discovered materials, long thought lost or destroyed, including illustrations, equations and chalkboard diagrams, which Whitehead used in classroom settings, have never before been seen by contemporary scholars. A projected six volumes of unpublished material will illuminate many factors influencing the development of Whitehead's initial and later thought, as well as elucidate, in considerably greater detail than ever before, many of the principal concepts later set out in his body of published philosophical reflection.

New critical editions of his famous lecture series at Harvard University, such as *Science and the Modern World*, *Symbolism* and *The Function of Reason*, his world-renowned Gifford lecture series at Edinburgh University in 1928, *Process and Reality*, together with new editions of justifiably famous collections of later essays and public lectures, such as *Adventures of Ideas* and *Modes of Thought*, will round out this ambitious and authoritative Critical Edition.

Editorial Advisory Board

The editorial advisory board is composed of respected Whitehead scholars from the United States, Canada and Europe who will ensure the scholarly integrity and quality of the Critical Edition of Whitehead:
