

Notes on Contributors

Susan Banducci is a professor of Political Science at the University of Birmingham. Her research focuses on media, elections and gender. She is co-editor with Katharine Tyler and Cathrine Degnen of the forthcoming *Reflections on Polarisation and Inequalities in Brexit Pandemic Times: Fractured Lives in Britain* (2025). Her research has been funded by the UKRI, European Commission and the European Research Council.

Kiran Arabaghatta Basavaraj is a research fellow at the University College London (UCL). He specialises in computational and experimental methodologies, and his research interests include social media, misinformation, communication and social cognition. His research has been funded by the British Academy, Economic and Social Research Council and the Electoral Integrity Project.

Hannah Bunting is a senior lecturer in Quantitative British Politics and co-director of the Elections Centre at the University of Exeter. Her research focuses on elections, voter behaviour, gender and politics, and political trust, with expertise in quantitative methods applied across all levels of government in Britain. Her work has been funded by the Economic and Social Research Council, and she regularly provides expert commentary to the media to inform public understanding of British elections.

Iulia Cioroianu is a senior lecturer in the Department of Politics, Languages and International Studies at the University of Bath. She is a computational social scientist who studies online communication and information exposure using natural language processing, network analysis and experiments. Her research has been funded by the British Academy, the Economic and Social Research Council and industrial partners.

Patrick English is Director of Political Analytics at YouGov. He is responsible for election modelling and forecasting across YouGov's European markets, and leads on research and development for survey methods, data analysis, artificial intelligence, segmentation models and multi-level regression and post-stratification. His work at YouGov focuses on producing in-depth knowledge and cutting-edge analytics, helping political parties, think tanks, pressure groups and third sector and academic clients better understand and change their world in data. He holds a doctorate from the University of Manchester.

Shukru Esmene is a research fellow in Human Geography at the Centre for Geography and Environmental Science, University of Exeter (Cornwall). His research focuses on social innovations that respond to subjective, societal issues, for example, ageing and wellbeing, and how such innovations can be co-designed within and by communities. More recently, his work has delved into developing participatory methods that support all stages of co-designing social innovations – including communication and sharing knowledge between different social contexts. His research has been funded by Interreg 2 Seas, which is part of the European Union's European Regional Development Fund (ERDF).

Amanda Haraldsson is a post-doctoral researcher, most recently at the Communication and Culture Department of Audencia Business School. Her research centres on gender, media and politics. She earned her PhD at the European University Institute with her thesis titled 'Media Discrimination and Women's Political Representation: Experimental Evidence of Media Effects on the Supply-Side', and her research has been published, among others, in *Political Research Quarterly* and *Feminist Media Studies*.

Laszlo Horvath is a senior lecturer at Birkbeck, University of London and deputy director of the Birkbeck Centre for British Political Life. He specialises in the areas of political communication and digital politics, focusing on computational and experimental methodologies. His research has been funded by the British Academy and the Economic and Social Research Council.

Charlotte James is a senior research associate in Medical Statistics and Health Data Science at the University of Bristol. She is a multidisciplinary data scientist, specialising in the application of machine learning and AI in health-care. Her research has been funded by the National Institute for Health and

Care Research, Alzheimer's Research UK and the Engineering and Physical Sciences Research Council.

Ekaterina Kolpinskaya is a senior lecturer at the University of Exeter (Cornwall). Her research focuses on political representation, religion and politics and legislative studies, especially in Britain. She is an author, with Stuart Fox, of *Religion and Euroscepticism in Brexit Britain* (2021). Her research has been funded by the Economic and Social Research Council, and she has held a parliamentary academic fellowship with the UK Parliament in 2022–2024.

Catherine Leyshon is a professor of Human Geography at the University of Exeter (Cornwall). She is co-director of the Social Innovation Group which specialises in place-based, person-centred approaches to care. Her work has covered tackling loneliness and isolation in rural communities in the United Kingdom, France, Belgium and the Netherlands, and understanding the role of the voluntary sector in integrated care systems in the United Kingdom. Her research has been funded by the Economic and Social Research Council and Interreg 2 Seas.

Michael Leyshon is an associate professor of Social Geography and co-director of the Social Innovation Group at the University of Exeter (Cornwall). His research explores how third sector agencies innovate to produce social change through place-based person-centred approaches. He has published widely on a variety of issues focused on care systems in rural areas. His research has been funded by the Economic and Social Research Council, New Economics Foundation and Interreg 2 Seas.

Daniel Stevens is a professor of politics at the University of Exeter (Cornwall). He specialises in political behaviour and political communication, particularly in Britain and the United States. He is the author, with Barbara Allen, of *Truth in Advertising? Lies in Political Advertising and How they Affect the Electorate* (2019) and, with Nick Vaughan-Williams, of *Everyday Security Threats: Perceptions, Experiences, and Consequences* (2017). His research has been funded by the British Academy, Economic and Social Research Council and Interreg 2 Seas.

Daniel Ziebarth is a PhD candidate in the Department of Political Science at George Washington University and in the Law Group at Wageningen University. His research primarily focuses on climate and environmental

policy, with other substantive interests including democracy, migration, public opinion, elections and public law. He has received research awards which include the Ernst Mach Fellowship and Joachim Herz Fellowship, and his work has been published in journals including *British Politics*, *Political Studies Review*, *Local Government Studies*, *Environmental Law Review*, *UIC Law Review* and *St. Mary's Law Journal*.
