

CONTENTS

	PREFACE	ix
1	Introduction	1
	1.1 Serendipity during the Cold War	1
	1.2 A New Field Begins	7
	1.3 Precise Localizations and the Search for Counterparts	10
	1.4 The March 5th Event and Soft-Gamma Ray Repeaters	12
	1.5 BATSE and the Great Debate	16
	1.6 The Afterglow Era Begins	23
	1.7 Progenitors and Diversity	29
	1.8 Gamma-Ray Bursts in a Universal Context	37
2	Into the Belly of the Beast	40
	2.1 What Are Gamma-Ray Bursts?	40
	2.2 Understanding the Origin of the High-Energy Emission	52
	2.3 The Central Engine	62
3	Afterglows	72
	3.1 Phenomenology	73
	3.2 Origin of the Emission	90

3.3	Evidence for Jetting	105
3.4	Late-Time Observations	111
4	The Events in Context	113
4.1	Local Scales	114
4.2	Galactic Scales	121
4.3	Universal Scales	127
5	The Progenitors of Gamma-Ray Bursts	135
5.1	A Massive-Star Origin	137
5.2	Mergers of Compact Objects	150
5.3	Extragalactic Magnetars	163
5.4	Classification Challenges	165
6	Gamma-Ray Bursts as Probes of the Universe	169
6.1	Studies of Gas, Dust, and Galaxies	171
6.2	The History of Star Formation	177
6.3	Cosmic Dawn: Measuring Reionization and the First Objects in the Universe	181
6.4	Neutrinos, Gravitational Waves, and Cosmic Rays	191
6.5	Quantum Gravity and the Expansion of the Universe	195
6.6	The Future of Gamma-Ray Bursts: At the Nexus of Physical and Astrophysical Inquiry	200
	NOTES	203
	SUGGESTIONS FOR FURTHER READING	227
	GLOSSARY	231
	INDEX	249
