|--|----------|
| Preface | xi |
| PART 1. BASIC MATERIAL | 1 |
| Chapter 1. Introduction | 3 |
| 1.1 Dehn Filling and Thurston's Theorem | 3 |
| 1.2 Definition of a Horotube Group | 3 |
| 1.3 The Horotube Surgery Theorem | 4 |
| 1.4 Reflection Triangle Groups | 6 |
| 1.5 Spherical CR Structures | 7 |
| 1.6 The Goldman-Parker Conjecture | 9 |
| 1.7 Organizational Notes | 10 |
| Chapter 2. Rank-One Geometry | 12 |
| 2.1 Real Hyperbolic Geometry | 12 |
| 2.2 Complex Hyperbolic Geometry | 13 |
| 2.3 The Siegel Domain and Heisenberg Space | 16 |
| 2.4 The Heisenberg Contact Form | 19 |
| 2.5 Some Invariant Functions | 20 |
| 2.6 Some Geometric Objects | 21 |
| Chapter 3. Topological Generalities | 23 |
| 3.1 The Hausdorff Topology | 23 |
| 3.2 Singular Models and Spines | 24 |
| 3.3 A Transversality Result | 25 |
| 3.4 Discrete Groups | 27 |
| 3.5 Geometric Structures | 28 |
| 3.6 Orbifold Fundamental Groups | 29 |
| 3.7 Orbifolds with Boundary | 30 |
| Chapter 4. Reflection Triangle Groups | 32 |
| 4.1 The Real Hyperbolic Case | 32 |
| 4.2 The Action on the Unit Tangent Bundle | 33 |
| 4.3 Fuchsian Triangle Groups | 33 |
| 4.4 Complex Hyperbolic Triangles | 35 |
| 4.5 The Representation Space | 37 |
| 4.6 The Ideal Case | 37 |

| | |
|--|----|
| Chapter 5. Heuristic Discussion of Geometric Filling | 41 |
| 5.1 A Dictionary | 41 |
| 5.2 The Tree Example | 42 |
| 5.3 Hyperbolic Case: Before Filling | 44 |
| 5.4 Hyperbolic Case: After Filling | 45 |
| 5.5 Spherical CR Case: Before Filling | 47 |
| 5.6 Spherical CR Case: After Filling | 48 |
| 5.7 The Tree Example Revisited | 49 |
| | |
| PART 2. PROOF OF THE HST | 51 |
| | |
| Chapter 6. Extending Horotube Functions | 53 |
| 6.1 Statement of Results | 53 |
| 6.2 Proof of the Extension Lemma | 54 |
| 6.3 Proof of the Auxiliary Lemma | 55 |
| | |
| Chapter 7. Transplanting Horotube Functions | 56 |
| 7.1 Statement of Results | 56 |
| 7.2 A Toy Case | 56 |
| 7.3 Proof of the Transplant Lemma | 59 |
| | |
| Chapter 8. The Local Surgery Formula | 61 |
| 8.1 Statement of Results | 61 |
| 8.2 The Canonical Marking | 62 |
| 8.3 The Homeomorphism | 63 |
| 8.4 The Surgery Formula | 64 |
| | |
| Chapter 9. Horotube Assignments | 66 |
| 9.1 Basic Definitions | 66 |
| 9.2 The Main Result | 67 |
| 9.3 Corollaries | 69 |
| | |
| Chapter 10. Constructing the Boundary Complex | 72 |
| 10.1 Statement of Results | 72 |
| 10.2 Proof of the Structure Lemma | 73 |
| 10.3 Proof of the Horotube Assignment Lemma | 75 |
| | |
| Chapter 11. Extending to the Inside | 78 |
| 11.1 Statement of Results | 78 |
| 11.2 Proof of the Transversality Lemma | 79 |
| 11.3 Proof of the Local Structure Lemma | 81 |
| 11.4 Proof of the Compatibility Lemma | 82 |
| 11.5 Proof of the Finiteness Lemma | 83 |
| | |
| Chapter 12. Machinery for Proving Discreteness | 85 |
| 12.1 Chapter Overview | 85 |
| 12.2 Simple Complexes | 86 |

| | |
|---|-----|
| CONTENTS | ix |
| 12.3 Chunks | 86 |
| 12.4 Geometric Equivalence Relations | 87 |
| 12.5 Alignment by a Simple Complex | 88 |
| Chapter 13. Proof of the HST | 91 |
| 13.1 The Unperturbed Case | 91 |
| 13.2 The Perturbed Case | 92 |
| 13.3 Defining the Chunks | 94 |
| 13.4 The Discreteness Proof | 96 |
| 13.5 The Surgery Formula | 97 |
| 13.6 Horotube Group Structure | 97 |
| 13.7 Proof of Theorem 1.11 | 99 |
| 13.8 Dealing with Elliptics | 100 |
| | |
| PART 3. THE APPLICATIONS | 103 |
| | |
| Chapter 14. The Convergence Lemmas | 105 |
| 14.1 Statement of Results | 105 |
| 14.2 Preliminary Lemmas | 106 |
| 14.3 Proof of the Convergence Lemma I | 107 |
| 14.4 Proof of the Convergence Lemma II | 108 |
| 14.5 Proof of the Convergence Lemma III | 111 |
| | |
| Chapter 15. Cusp Flexibility | 113 |
| 15.1 Statement of Results | 113 |
| 15.2 A Quick Dimension Count | 114 |
| 15.3 Constructing The Diamond Groups | 114 |
| 15.4 The Analytic Disk | 115 |
| 15.5 Proof of the Cusp Flexibility Lemma | 116 |
| 15.6 The Multiplicity of the Trace Map | 118 |
| | |
| Chapter 16. CR Surgery on the Whitehead Link Complement | 121 |
| 16.1 Trace Neighborhoods | 121 |
| 16.2 Applying the HST | 122 |
| | |
| Chapter 17. Covers of the Whitehead Link Complement | 124 |
| 17.1 Polygons and Alternating Paths | 124 |
| 17.2 Identifying the Cusps | 125 |
| 17.3 Traceful Elements | 126 |
| 17.4 Taking Roots | 127 |
| 17.5 Applying the HST | 128 |
| | |
| Chapter 18. Small-Angle Triangle Groups | 131 |
| 18.1 Characterizing the Representation Space | 131 |
| 18.2 Discreteness | 132 |
| 18.3 Horotube Group Structure | 132 |
| 18.4 Topological Conjugacy | 133 |

| | |
|--|-----|
| PART 4. STRUCTURE OF IDEAL TRIANGLE GROUPS | 137 |
| Chapter 19. Some Spherical CR Geometry | 139 |
| 19.1 Parabolic \mathbf{R} -Cones | 139 |
| 19.2 Parabolic \mathbf{R} -Spheres | 139 |
| 19.3 Parabolic Elevation Maps | 140 |
| 19.4 A Normality Condition | 141 |
| 19.5 Using Normality | 142 |
| Chapter 20. The Golden Triangle Group | 144 |
| 20.1 Main Construction | 144 |
| 20.2 The Proof modulo Technical Lemmas | 145 |
| 20.3 Proof of the Horocusp Lemma | 148 |
| 20.4 Proof of the Intersection Lemma | 150 |
| 20.5 Proof of the Monotone Lemma | 151 |
| 20.6 Proof of The Shrinking Lemma | 154 |
| Chapter 21. The Manifold at Infinity | 156 |
| 21.1 A Model for the Fundamental Domain | 156 |
| 21.2 A Model for the Regular Set | 160 |
| 21.3 A Model for the Quotient | 162 |
| 21.4 Identification with the Model | 164 |
| Chapter 22. The Groups near the Critical Value | 165 |
| 22.1 More Spherical CR Geometry | 165 |
| 22.2 Main Construction | 167 |
| 22.3 Horotube Group Structure | 169 |
| 22.4 The Loxodromic Normality Condition | 170 |
| Chapter 23. The Groups far from the Critical Value | 176 |
| 23.1 Discussion of Parameters | 176 |
| 23.2 The Clifford Torus Picture | 176 |
| 23.3 The Horotube Group Structure | 177 |
| Bibliography | 181 |
| Index | 185 |
