## **How to Use This Book** xvii

Format of the Species Accounts xvii

## **Introduction** 1

What Are Tubenoses? 1

Ocean Habitats 5

Current Systems 6

Thermoclines, Upwelling, and Fronts 6

Habitat Associations 10

Phylogeny, Biogeography, and Vagrancy 13

Taxonomy and an Identification Framework 14

Family Procellariidae: Petrels 17

Family Diomedeidae: Albatrosses 19

Family Hydrobatidae: Northern Storm-Petrels 20

Family Oceanitidae: Southern Storm-Petrels 21

Field Identification of Tubenoses 21

Age, Sex, Individual, and Geographic Variation 21

Flight Manner 24

Environmental Factors 28

Appearance and Topography 30

Molts, Plumages, and Aging 38

How to See Tubenoses 45

Conservation 46

Threats to Seabirds 47

Seabirds as Indicators 48

*Species Accounts* 51–454

*Abbreviations and Terminology* 455

*Appendix A. Recently Extinct Species* 459

*Appendix B. Hypothetical Records* 461

*Literature Cited* 463

*Index* 481
