

## List of Figures

---

4.1	The freezing-point curve of mixtures of copper and zinc, redrawn from E. S. Shepherd (1904)	185
4.2	A phase diagram of brass, redrawn from E. S. Shepherd (1904)	187
5.1	The melting temperatures of the soda lime feldspars according to Day and Allen (1905)	231
5.2	Equilibrium diagram of soda lime feldspars	232
6.1	G. N. Lewis's memorandum of 1902 and his 1916 depiction of the outer electronic structure of the elements from lithium to fluorine	280
6.2	Different forms of the molecule $I_2$ according to G. N. Lewis (1916)	281
6.3	E. C. Stoner's suggested distribution of electrons in the inert elements (1924)	286
6.4	Linus Pauling's depiction of the relative orientations of various electron-pair bonds (1932)	292
