# Contents

**1 Review of Concepts** **3**
- 1.1 Theory of Quadratic Polynomials . . . . . 3
  - 1.1.1 Weak hyperbolicity of quadratic polynomials . 5
- 1.2 Dense Hyperbolicity . . . . . 6
  - 1.2.1 Theorem and its consequences . . . . . 6
  - 1.2.2 Reduced theorem . . . . . 10
- 1.3 Steps of the Proof of Dense Hyperbolicity . . . . . 12
  - 1.3.1 Regularly returning sets and box mappings . . 12
  - 1.3.2 Quadratic-like returns . . . . . 16
  - 1.3.3 Initial construction and geometry of inducing . 18
  - 1.3.4 Branchwise equivalence . . . . . 19
  - 1.3.5 Pull-back . . . . . 22
  - 1.3.6 Conclusion of dense hyperbolicity . . . . . 24

**2 Quasiconformal Gluing** **25**
- 2.1 Extendibility and Distortion . . . . . 26
  - 2.1.1 Distortion lemmas . . . . . 26
  - 2.1.2 Geodesic neighborhoods . . . . . 28
- 2.2 Saturated Maps . . . . . 30
- 2.3 Gluing of Saturated Maps . . . . . 35
  - 2.3.1 The main step of the construction . . . . . 38
  - 2.3.2 Proof of the reduced theorem . . . . . 44

**3 Polynomial-Like Property** **45**
- 3.1 Domains in the Complex Plane . . . . . 45
- 3.2 Cutting Times . . . . . 47
  - 3.2.1 Reduction to a real estimate . . . . . 52
  - 3.2.2 Proof of the real estimate . . . . . 61

**4 Linear Growth of Moduli** **67**
4.1 Box Maps and Separation Symbols . . . . . 67
4.1.1 A general outline . . . . . 67
4.1.2 The growth of moduli . . . . . 70
4.1.3 Separation symbols . . . . . 71
4.1.4 Non-close returns . . . . . 75
4.1.5 Close returns . . . . . 85
4.2 Conformal Roughness . . . . . 87
4.2.1 Lack of roughness as regularity . . . . . 89
4.2.2 Quasi-invariance of roughness. . . . . 95
4.3 Growth of the Separation Index . . . . . 100
4.3.1 Consequences of roughness . . . . . 100
4.3.2 Proof of Theorem 1.2 . . . . . 105

**5 Quasiconformal Techniques** **109**
5.1 Initial Inducing . . . . . 109
5.1.1 Yoccoz partition . . . . . 109
5.1.2 Holomorphic motions and q.c. correspondence 112
5.2 Quasiconformal Pull-back . . . . . 120
5.2.1 Definition of pull-back . . . . . 120
5.2.2 Maximal dilatation and the pull-back . . . . . 124
5.3 Gluing Quasiconformal Maps . . . . . 129
5.3.1 Quasiconformal mappings on ring domains . . 129
5.4 Regularity of Saturated Maps . . . . . 133
5.5 Straightening Theorem . . . . . 139

**Bibliography** . . . . . 143

**Index** . . . . . 147
