

# Acknowledgments

---

Roberta Findlay does not make for easy subject matter—a status we are certain she would appreciate—but her films and career provided an ideal opportunity for a fruitful and rewarding alliance. Our thanks to everyone at Edinburgh University Press, and particularly the series editors, Gary D. Rhodes, Robert Singer, and Frances Smith, for supporting our vision. Friends Alicia Kozma and Finley Freibert inspired this project with their own *ReFocus* volume on the similarly neglected filmmaker Doris Wishman, which provided the perfect lantern to light our way.

The process of creating this book was a pleasant and pleasurable one, marked by collaborations with the good folk who make this kind of work such a joy to do. We have deep gratitude for the tremendous roster of contributors whose work fills these pages—not just colleagues, but compatriots in a community of like-minded sleaze surveyors. Anyone who takes Roberta Findlay's work seriously needs to read both scholarly work in porn studies and also message boards and *Fangoria*. To that end, we thank our many friends and colleagues in the Society for Cinema and Media Studies Adult Film History Scholarly Interest Group who have built such an inviting and supportive community, and also the posters at places such as the old DVDManiacs (later AVManiacs) board who collectively built one of the best sources of Findlay knowledge out there. No work on Findlay could be complete without the committed research of Casey Scott, as well as the endless riches April Hall and Ashley West have imbued within *The Rialto Report*. When we hit a brick wall regarding the facts of Findlay's biography, Andy McCarthy at the New York Public Library solved our methodological quandary, while Steve Puchalski at *Shock Cinema* and John Sirabella at Media Blasters provided otherwise elusive copies of Findlay's films. Our completist urges would otherwise never have been sated.

We also thank Karen Sperling for her willingness to speak about her own overlooked career, as well as her generosity with the images that appear in this book. Joe Rubin didn't just write the Foreword, or create and operate the mighty Vinegar Syndrome, with its vital film preservation mission, he also continues to be a valued and trusted friend and colleague. Robin Bougie deserves a special note of appreciation, as a key contributor to Findlay knowledge in his brilliant *Cinema Sewer* and elsewhere. We owe him a lot; he knows why.

We also thank Roberta Findlay. She cuts a daunting figure in the mythologies and urban legends of the fan world, and we were a bit intimidated to reach out to her. But once we connected, she was nothing but pure delight, even in her withering sarcasm toward the worth of this book. Our affection for her doesn't mean these chapters aren't critical—they certainly are, though not nearly as severe as her own judgment of her work. We hope she finds the analyses here meritorious, but barring that, that she meets them with a good quip.

Finally, the people in our lives, who provided crucial support beyond the visible page. This entire book was conceived, written, and published during the worst global pandemic in a century, and everyone who in any way contributed to ameliorating its ravages has our profound gratitude. Indeed, working on *Roberta Findlay* at times offered a welcome respite from the fears and anxieties of our times. It's rare that scholarly labor is also *fun*, but as friends and mutual admirers, we both really enjoyed this and hit the exact right groove for rewarding and productive collaboration, so we thank one another for that. Peter thanks his students and colleagues at the University of Oregon, who unflaggingly support projects such as this one without hesitation. Whit thanks his students and colleagues at Rutgers University–Newark and comrades at North New Jersey Democratic Socialists of America (a better world is possible!). We also thank our cats: for Peter, the late, great, and incomparable Holmes, who died during this book's production but will live forever in the cat hall of fame; for Whit, the distinctly unambitious Polly, Persimmon (RIP), and Dusty, despite their slothful and filthy ways. Last, but not least, we are grateful for the endless good humor and encouragement of our respective partners, Erin Hanna and Mary Rizzo, themselves distinguished scholars (and best possible sounding boards), who at times seemed to secretly suspect this project was nothing more than an alibi for us to hang out with people we like and admire and watch trashy movies. They may know us better than we know ourselves.
