

Glossaries

The glossary of Akkadian words contains all reconstructed words in the texts edited in this volume. The attestations of the forms and orthographies of a specific lemma are listed in alphabetical order, with completely preserved instances listed first, followed by increasingly damaged or questionable ones. Verbal adjectives and participles are listed separately from the verbs; statives are listed under the corresponding verb rather than the adjective. For each attested verbal form the stem is added in square brackets for convenience. Bipartite phrases with a specific meaning distinct from the components or forming fixed expressions are usually listed as a single unit alphabetised under the first term, with minor exceptions. Logograms for which the Akkadian reading is unclear or ambiguous are listed under the logographic form. Terms for cardinal numbers are listed under the masculine absolute form. Complex prepositions or adverbials are listed under the nominal component. Only one occurrence of a word is listed if the same word occurs more than once in a given line. Distinct orthographies of the same term preserved in multiple text manuscripts (or orthographies that are damaged to a differing extent) are listed separately.

The normalised forms of lemmas in the Sumerian glossary follow ePSD2.
