

## Acknowledgments

I would like to thank all the contributors to this volume for their time, patience and effort in producing this book.

Special and sincere thanks go to Federica Mastroianni for her extensive effort, which went beyond the handling of the considerable correspondence associated with the book and organisation of the reviewing process. Thanks are also extended to Gian Tomaso Masala for his reviewing of the chapter references.

Finally, I wish to dedicate this volume to the memory of Raul Gardini, who was a pioneer of Bioeconomy, and the unwitting origin of my interest and dedication to renewable raw materials and bioplastics.
