Preface — VII

1 Cryptocurrency Dataset — 1

- 1.1 Crypto Token Descriptions — 1
- 1.2 Performance of Hourly Data — 10

2 Return Time Series — 15

- 2.1 Stationarity — 15
 - 2.1.1 Equally Weighted Portfolio Benchmarks — 19
 - 2.1.2 Distance between Returns — 23
- 2.2 Tail Behavior of Returns — 26
 - 2.2.1 The Non-Normal Nature of Returns — 27
 - 2.2.2 The Generalized Pareto Distribution — 30
 - 2.2.3 The Hill Estimator for the Tail Index — 32

3 Modern Portfolio Theory — 37

- 3.1 Mean-Variance Portfolio Optimization — 37
 - 3.1.1 Capital Market Line and the Mean-Variance Tangent Portfolio — 41
 - 3.1.2 Empirical Application of Mean-Variance Optimization using MATLAB — 43
 - 3.1.3 Alternate Equivalent Formulations of Mean-Variance Optimization — 48
- 3.2 CVaR-Minimizing Portfolios — 50
 - 3.2.1 Coherent Risk Measures — 51
 - 3.2.2 Mean-CVaR Portfolio Optimization — 52
 - 3.2.3 Capital Market Line and the Mean-CVaR Tangent Portfolio — 55
 - 3.2.4 Empirical Application of Mean-CVaR Optimization using MATLAB — 56

4 Historical Portfolio Optimization — 61

- 4.1 Basic Strategies: Return and Weight Performance — 62
 - 4.1.1 Long-Only Strategy — 63
 - 4.1.2 Jacobs et al. Long-Short Strategy — 65
 - 4.1.3 Lo-Patel Long-Short Strategy — 69
 - 4.1.4 Momentum Strategy — 71
 - 4.1.5 Minimum-Risk versus Tangent Portfolio Composition — 74
- 4.2 Performance Under Turnover Constraints — 75
- 4.3 Performance-Risk Measures — 82

5 Dynamic Portfolio Optimization — 91

- 5.1 Development of the Dynamic Optimization Method — 92
- 5.1.1 ARMA(1,1)-GARCH(1,1) with Student's t -Distribution — 92

5.1.2	Multivariate t -Distribution and t -Copulas —	93
5.1.3	Generation of Dynamic Returns —	94
5.2	Empirical Examples: Dynamic Portfolio Optimization —	96
5.2.1	Long-Only Strategy —	96
5.2.2	Jacobs et al. Long-Short Strategy —	108
5.2.3	Lo-Patel Long-Short Strategy —	111
5.2.4	Closing Remarks – Dynamic Optimization —	114
6	Robust Portfolio Optimization —	117
6.1	Uncertainty Sets for Expected Returns —	118
6.1.1	Box Uncertainty Sets —	119
6.1.2	Ellipsoidal Uncertainty Sets —	120
6.2	Kantorovich Distance between Discrete Random Variables —	122
6.3	Robust CVaR Optimization on Historical Returns —	125
6.3.1	Empirical Application of Robust CVaR Optimization using MATLAB —	128
6.3.2	Empirical Examples: Robust CVaR Optimization —	135
7	Backtesting —	141
7.1	VaR Tests —	143
7.1.1	Binomial Test —	143
7.1.2	Traffic Light Test —	144
7.1.3	Kupiec's Tests —	144
7.1.4	Christoffersen's Tests —	146
7.1.5	Haas's Tests —	147
7.2	Backtest Results —	149
7.2.1	Historical Optimization —	149
7.2.2	Dynamic Optimization —	151
7.2.3	Robust Optimization —	154
	Bibliography —	159
