

Acknowledgments

An endeavor of this magnitude is not possible without the support of countless individuals, so we would like to express our gratitude to our students and other readers who through the years have provided feedback on the content of the previous three editions of this text. The first author would like to acknowledge the Late Robert Halsall, founding president of Halsall Associates Ltd. (now WSP), for providing me the opportunity to acquire the training and experience that have been the solid foundation for my professional career. We are also grateful to our colleagues in the consulting engineering industry and in academia who have provided feedback to us over the years.

We thank our families for their enduring support and encouragement. We would also like to thank the reviewers of this text and would welcome and appreciate any comments or questions regarding the contents of the book.
