

CONTENTS

<i>Preface</i>	<i>xix</i>
<i>Abbreviations</i>	<i>xxi</i>
Chapter 1 Basics of Remote Sensing	1
1.1 Introduction	1
1.2 Principles of Remote Sensing	5
1.3 Remote Sensing Data Acquisition	6
1.3.1 Energy Source	6
1.3.2 Energy Propagation Through the Atmosphere	6
1.3.3 Energy Interaction with Objects/Targets	7
1.3.4 Energy Received by the Sensors	7
1.3.5 Data Transmission, Reception, and Processing	8
1.3.6 Data Interpretation and Analysis	8
1.3.7 Applications	8
1.4 Types of Remote Sensing Systems	8
1.4.1 Optical Remote Sensing System	9
1.4.2 Thermal Infrared Remote Sensing System	9
1.4.3 Microwave Remote Sensing System	10
1.5 Some Technical Terms	11
Electromagnetic Spectrum (EMS)	11
Reflected Energy	11
Absorption	11
Transmission	11
Platform	11
Sensor	11
Spectral Band	11
Image	12

	Pixel	12
	Gray Scale	12
	Digital Number (DN)	12
	Histogram	12
	Brightness of an Image	12
	Contrast of an Image	13
	Classification	13
	Thematic Map	13
1.6	Various Forms of Remote Sensing Data	13
1.6.1	Black and White Images	14
1.6.2	Multispectral Images	15
1.6.3	Hyperspectral Images	16
1.6.4	Color Composite Images	17
1.6.4.1	Natural Color Composite	18
1.6.4.2	False Color Composite (FCC)	18
1.7	The Multi-Concept in Remote Sensing	19
1.7.1	Multistage	20
1.7.2	Multi-Resolution	20
1.7.3	Multi-Band	21
1.7.4	Multi-Sensors	21
1.7.5	Multi-Temporal	21
1.7.6	Multi-Direction	22
1.7.7	Multidisciplinary	22
1.7.8	Multi-Thematic Maps	22
1.7.9	Multi-Uses	22
1.8	Advantages and Disadvantages of Remote Sensing	22
1.8.1	Advantages of Remote Sensing	23
1.8.2	Disadvantages of Remote Sensing	23
1.9	Approaches of Remote Sensing Data Acquisition	24
1.9.1	Topographic/Thematic Maps	24
1.9.2	Advanced Surveying Instruments	25
1.9.3	Global Positioning System (GPS)	25
1.9.4	Ground Penetrating Radar (GPR)	26
1.9.5	Photogrammetry	28
1.9.6	Unmanned Aerial Vehicle (UAV)/Drone	29
1.9.7	Light Detection and Ranging (LiDAR)	32
1.9.8	Remote Sensing Images	35
1.10	Sources of Remote Sensing Data	37

Chapter 2	Electromagnetic Radiations and Interaction with Atmosphere	41
2.1	Introduction	41
2.2	Components of EMS	42
2.3	Interaction of EMR with Atmosphere	45
2.3.1	Reflection	46
2.3.2	Transmission	47
2.3.3	Absorption	47
2.3.3.1	Atmospheric Windows	48
2.3.4	Scattering	50
2.3.4.1	Rayleigh Scattering	51
2.3.4.2	Mie Scattering	52
2.3.4.3	Nonselective Scattering	52
2.4	Black Body Radiation	53
2.4.1	Black Body	53
2.4.2	Radiation Laws	55
2.5	Spectral Signature of Objects	57
2.6	Measurement of Spectral Reflectance	59
2.7	Atmospheric Corrections to Remote Sensing Images	61
Chapter 3	Various Remote Sensing Sensors and Data Characteristics	65
3.1	Introduction	65
3.2	Image Characteristics	66
3.2.1	Image Acquisition	66
3.2.2	Bits, Bytes, and Digital Number	68
3.2.3	Image Representation	69
3.2.4	Image Formats	70
3.3	Image Resolutions	72
3.3.1	Spatial Resolution	76
3.3.2	Spectral Resolution	78
3.3.3	Radiometric Resolution	79
3.3.4	Temporal Resolution	81
3.4	Remote Sensing Sensors	82
3.4.1	Passive Sensors	89
3.4.1.1	Photographic Systems	90
3.4.1.2	Electro-Optic Radiometers	90
3.4.1.3	Passive Microwave Systems	91
3.4.1.4	Visible, Infrared, and Thermal Imaging Systems	91

3.4.2	Active Sensors	92
3.4.2.1	Radar (Active Microwave)	93
3.4.2.2	LiDAR (Active Optical)	93
3.4.3	Optical Sensors	94
3.4.3.1	Sensors in Landsats	94
3.4.3.2	Sensors in Spots	100
3.4.3.3	Sensors in IRSs	101
3.4.3.4	Sensors in Sentinel Systems	104
3.4.4	Thermal Sensors	105
3.4.4.1	Advanced Spaceborne Thermal Emission and Reflection Radiometer	109
3.4.4.2	Moderate-Resolution Imaging Spectroradiometer	110
3.4.4.3	Advanced Very High Resolution Radiometer	110
3.4.4.4	Thermal Infrared Sensor	111
3.4.4.5	Advanced Along Track Scanning Radiometer	111
3.4.5	Microwave Sensors	111
3.4.6	Hyperspectral Sensors	117
Chapter 4	Various Remote Sensing Platforms	123
4.1	Introduction	123
4.2	Types of Satellite Orbits	126
4.2.1	Geosynchronous Orbits	126
4.2.2	Sun-Synchronous Orbits	127
4.3	Path-Row Reference	128
4.4	Various Satellite Platforms	129
4.4.1	Low Resolution Satellites	131
4.4.1.1	Noaa-Avhr Systems	131
4.4.1.2	Terra-Modis	132
4.4.2	Medium Resolution Satellites	133
4.4.2.1	LANDSAT Systems	133
4.4.2.2	SPOT Systems	135
4.4.2.3	IRS Systems	137
4.4.2.4	Sentinel Systems	145
4.4.3	High/Very High Resolution Satellites	148
4.4.3.1	IKONOS	151
4.4.3.2	QuickBird	151
4.4.3.3	OrbView	151
4.4.3.4	GeoEye	152
4.4.3.5	WorldView	153

4.4.3.6	KOMPSAT	154
4.4.3.7	Pléiades	156
4.4.4	Thermal Remote Sensing Platforms	156
4.4.5	Microwave Remote Sensing Platforms	160
4.4.6	Hyperspectral Imaging Platforms	162
4.5	Small Satellites	167
4.6	Selection of Remote Sensing Images	172
4.6.1	Spatial Characteristics	173
4.6.2	Spectral Characteristics	175
4.6.3	Repeat Interval	175
4.6.4	Radiometric Characteristics	176
4.6.5	Image Area	176
4.6.6	Multi-Angle Images	176
4.6.7	Image Availability and its Cost	177
4.6.8	Cost-Effectiveness of Analysis	178
4.6.9	Technical Expertise	179
Chapter 5	Image Preprocessing Approaches	181
5.1	Introduction	181
5.2	Gray Level Thresholding	182
5.3	Image Enhancement	183
5.4	Contrast Enhancement	184
5.4.1	Linear Contrast Enhancement	186
5.4.1.1	Minimum-Maximum Linear Contrast Stretch	187
5.4.1.2	Percentage Linear Contrast Stretch	189
5.4.1.3	Piecewise Linear Contrast Stretch	189
5.4.2	Nonlinear Contrast Enhancement	190
5.4.2.1	Histogram Equalization	190
5.4.2.2	Logarithmic Stretching	192
5.4.2.3	Exponential Stretching	193
5.4.2.4	Power-Law Transformations	193
5.5	Spatial Filtering	194
5.5.1	Low-Pass Filters	196
5.5.2	High-Pass Filters	197
5.5.2.1	Edge Detection Filters	198
5.5.2.2	Directional Filters	201
5.5.2.3	Sharpening Filters	202
5.6	Noise Removal	203
5.7	Cloud Removal	203

5.8	Radiometric Corrections	203
5.8.1	Reflectance to Radiance Conversion	204
5.8.2	Atmospheric Correction Models	205
5.8.3	Atmospheric Haze Correction	205
5.9	Geometric Corrections	206
5.9.1	Georeferencing of Images	208
5.9.2	Resampling Methods	211
5.9.2.1	Nearest Neighbor Resampling	211
5.9.2.2	Bilinear Interpolation Resampling	212
5.9.2.3	Cubic Convolution Resampling	213
5.10	Image Transformations	214
5.10.1	Arithmetic Operations	215
5.10.2	Ratio Index	216
5.10.3	NDVI Vegetation Index	218
5.10.4	Other Indices	220
5.10.5	Tasseled Cap Transformation	222
5.10.6	Principal Component Analysis	226
5.11	Image Fusion Approaches	229
5.11.1	Spatio-Spectral Fusion	231
5.11.2	Spatiotemporal Fusion	231
5.11.3	Multi-Resolution Approach	236
5.11.4	Wavelet Transformation	236
5.11.5	Brovey Transformation	237
5.11.6	IHS Transformation	237
Chapter 6 Image Classification		241
6.1	Introduction	241
6.2	Manual (Visual) Interpretation Methods	242
6.2.1	Visual Interpretation Elements	243
6.2.2	Visual Interpretation Keys	248
6.2.3	Visual Interpretation Aids	250
6.2.4	Field Data Collection and Verification	250
6.3	Digital Interpretation	251
6.3.1	Supervised Classification	254
6.3.1.1	Minimum Distance Classification	260
6.3.1.2	Maximum Likelihood Classifier	263
6.3.1.3	Parallelepiped Classification	266
6.3.2	Unsupervised Classification	268
6.3.2.1	K-means Method	270
6.3.2.2	Iterative Self-Organizing Data Analysis Technique (ISODATA)	271

6.4	Post Classification	275
6.4.1	Smoothing Filters	275
6.4.2	Accuracy Assessment	276
6.4.2.1	Error Matrix	277
6.4.2.2	Kappa Coefficient	281
Chapter 7	State-of-Art Classification Techniques	285
7.1	Introduction	285
7.2	Advanced Classification Techniques	287
7.2.1	Artificial Neural Network (ANN)	289
7.2.2	Convolutional Neural Network (CNN)	295
7.2.3	Recurrent Neural Network (RNN)	299
7.2.4	Region-Based CNN	300
7.2.5	Fast R-CNN	301
7.2.6	Faster R-CNN	302
7.2.7	Object-Based Image Analysis (OBIA)	304
7.2.8	Decision Tree (DT)	309
7.2.9	Extraction and Classification of Homogeneous Objects (ECHO)	313
7.2.10	Fuzzy Classifiers	314
7.2.11	Fuzzy C-Means (FCM)	316
7.2.12	The Possibilistic C-Means	319
7.2.13	K-Nearest Neighbor	322
7.2.14	Genetic Algorithm	323
7.2.15	Artificial Intelligence	326
7.2.16	Machine Learning Classifier	333
7.2.17	Deep Learning Classifiers	337
7.2.18	Random Forest	340
7.2.19	Support Vector Machine	345
7.2.20	Markov Random Field	348
7.2.21	Spectral Angle Mapper	350
7.2.22	Spectral Mixture Analysis	351
7.2.23	Texture-Based Classifiers	354
7.2.24	Cellular Automata	358
7.3	Free and Open-Source Software (FOSS)	362
7.3.1	Apache Spark	364
7.3.2	Clas Lite	365
7.3.3	E-Foto	365
7.3.4	Geo Express	365

7.3.5	Geographic Resources Analysis Support System	366
7.3.6	Geoserver	366
7.3.7	Gmt Mapping Tools	366
7.3.8	gvSIG	366
7.3.9	Image Analyzer	367
7.3.10	Imagej	367
7.3.11	Integrated Land and Water Information System	367
7.3.12	Interimage	367
7.3.13	Mapnik	368
7.3.14	Mapserver	368
7.3.15	Maptitude	368
7.3.16	Multispec	368
7.3.17	OpenEV	368
7.3.18	Openlayers	369
7.3.19	Open Source Software Image Map	369
7.3.20	Optical and Radar Federated Earth Observation Toolbox	369
7.3.21	Opticks	370
7.3.22	Polarimetric Sar Data Processing (PolSARPro)	370
7.3.23	Python	370
7.3.24	Quantum GIS	371
7.3.25	R	372
7.3.26	Sentinel Toolbox	372
7.3.27	SPRING	373
7.3.28	System for Automated Geoscientific Analyses	373
7.3.29	TensorFlow	373
7.3.30	Torch	374
7.3.31	Waikato Environment for Knowledge Analysis	375
7.4	Selection of Training Samples and Classification Algorithms	376

Chapter 8 Applications of Remote Sensing 381

8.1	Introduction	381
8.2	Some Useful Applications	383
8.2.1	Agriculture Development	386
8.2.2	Base/Thematic Mapping	388
8.2.3	Digital Terrain Mapping	388
8.2.4	Disaster Mitigation Planning	391
8.2.5	Geology and Minerals	395
8.2.6	Healthcare	395

8.2.7	Infrastructure Development and Planning	397
8.2.8	Land Use and Land Cover Mapping	397
8.2.9	Location Based Studies	399
8.2.10	Ocean/Coastal Studies	399
8.2.11	Online Mapping Services	400
8.2.12	Site Investigations and Planning	400
8.2.13	Snow and Glaciers	403
8.2.14	Transportation Network Mapping	404
8.2.15	Urban Development	405
8.2.16	Water Resources	407
8.2.17	Watershed Planning and Management	410
8.2.18	The 3D City Models	412
8.3	Conclusion	412

Chapter 9 Land Use and Land Cover Mapping and Modeling 415

9.1	Introduction	415
9.2	Need for LULC Maps	417
9.3	Role of Remote Sensing	418
9.4	Global LULC Datasets	423
9.5	LULC Change Assessment	425
9.6	LULC Prediction Modeling	434
9.7	Case Studies	439
9.7.1	Lulc Prediction	439
9.7.2	Urban Growth Prediction	441
9.8	Conclusion	444

Chapter 10 Remote Sensing Platforms for Agricultural Applications 447

10.1	Introduction	447
10.2	Potentials of Remote Sensing	449
10.3	Various Vegetation Indices	452
10.4	Modern Trends	458
10.5	Applications in Agriculture	461
10.5.1	Crop Condition Assessment	462
10.5.2	Crop Yield and Production Forecasting	465
10.5.3	Precision Agriculture	466
10.5.4	Crop Insurance	468

10.6	Case Studies	470
10.6.1	Crop Yield Modeling	470
10.6.2	Crop Classification	472
10.7	Conclusion	475

Chapter 11 Disaster Monitoring and Management Using Remote Sensing Technology 477

11.1	Introduction	477
11.2	Types of Disasters	478
11.3	Geospatial Data for Disasters	481
11.3.1	Various Satellites and Sensor Images	482
11.3.2	Unmanned Aerial Vehicle Images	487
11.3.3	Point Cloud Data	488
11.4	ATA Integration in GIS	490
11.5	Disaster Management Using Remote Sensing and GIS	491
11.6	Applications in Various Disasters	494
11.6.1	Cyclones	494
11.6.2	Drought	495
11.6.3	Earthquakes	495
11.6.4	Forest Fire	498
11.6.5	River Floods	499
11.6.6	Landslides	501
11.7	Case Study: Flood Hazard Mapping	502
11.8	Conclusion	505

Chapter 12 Remote Sensing of Snow Cover 507

12.1	Introduction	507
12.2	Spectral Characteristics of Snow	509
12.3	Satellites and Sensors for Snow Studies	511
12.4	Case Study: Snow Contamination from Hyperspectral Images	518
12.4.1	The Study Area and Method Used	518
12.4.2	Snow Grain Size Measurement	520
12.4.3	Spectra of Contamination in Snow	524
12.4.3.1	Soil Contamination	526
12.4.3.2	Coal Contamination	527
12.4.3.3	Carbon Soot Contamination	527

12.4.3.4	Sparse Mix Vegetation Contamination	527
12.4.3.5	Ash Contamination	528
12.4.3.6	Debris Contamination	528
12.4.3.7	Mixed Contamination on Snow	528
12.4.4	Spectral Unmixing Methods for Image Classification	529
12.5	Conclusion	532

Chapter 13 Feature/Object Extraction From Remote Sensing Algorithms 535

13.1	Introduction	535
13.2	Challenges in Object Detection Algorithms	536
13.3	Various Object Detection Algorithms	538
13.4	Case Studies	547
13.4.1	Extraction of Riverine Features	547
13.4.2	Automated Building Extraction	550
13.4.3	Detection of Pavement Cracks	553
13.5	Conclusion	555

Chapter 14 Applying Remote Sensing for Smart Cities 557

14.1	Introduction	557
14.2	Data: The Foundation of Smart Cities	559
14.3	Key Enabling Technologies for Smart Cities	561
14.3.1	ICT and IoT Technology	561
14.3.2	Geospatial Technology	565
14.3.3	Sensor Technology	568
14.3.4	Artificial Intelligence Technology	569
14.3.5	Blockchain Technology	570
14.4	Case Studies	573
14.4.1	Extraction of Urban Area Using Deep Learning	573
14.4.2	Mapping Urban Dynamics	576
14.5	Conclusion	579

Chapter 15 The Future of Remote Sensing 581

15.1	Introduction	581
15.2	Future Applications	583
15.3	Challenges and Problems	585
15.4	Opportunities	589

15.5	Technological Developments	591
15.6	Global Market Potential	597
15.7	Conclusion	599
Index		601
