

Advance Praise for *Autocracy 2.0*

“As China experiences its DeepSeek AI moment and leads the world in electric vehicles and other green technologies, Westerners can no longer be smug about their technological primacy. This illuminating book explains how authoritarian China accomplished these miracles despite heavy-handed social control and Western sanctions.”

—**Susan L. Shirk, author of *Overreach***

“*Autocracy 2.0* reshapes the debate on the threat posed by China. It convincingly demonstrates that China will innovate and compete successfully in the twenty-first century. A sobering must-read for anyone interested in American foreign policy and international relations.”

—**Dan Reiter, author of *How Wars End***

“A bold and well-argued attack on the thesis that authoritarian regimes are technologically stagnant. Lind marshals considerable evidence to show how China has moderated its authoritarian viciousness in order to become a top innovator in multiple high-tech industries. A must-read for political scientists, growth economists, and China-watchers.”

—**Mark Zachary Taylor, author of *The Politics of Innovation***

“A risky line of thought suggests China is doomed to slow down, with benign geostrategic implications. Lind argues that resting on democratic laurels is not a safe bet. *Autocracy 2.0* integrates grand strategy with political economy to show how China’s ‘smart authoritarianism’ works.”

—**Stephan Haggard, University of California San Diego**

“One doesn’t have to agree with the whole book to accept its one big insight: China is very smart. Americans underestimate it at their peril. This book will open their eyes to the remarkable sophistication of Chinese elites. A must-read.”

—**Kishore Mahbubani, author of *Has China Won?***

Autocracy 2.0

A VOLUME IN THE SERIES

Cornell Studies in Security Affairs
