Acknowledgments

This volume came out of the Workshop on Russian Modernism, "The Human Reimagined: Robots, Clones and Artificial Others," held in 2013 as part of the annual series at the University of Illinois at Chicago (UIC). We wish to thank the participants of the Workshop and the University sponsors who made this event possible: UIC's School for Literatures, Cultural Studies and Linguistics (LCSL), The Institute for the Humanities, and the Departments of Biological Sciences, History, and Slavic and Baltic Languages and Literatures. Additionally, we would like to express our gratitude to LCSL for the book subvention that defrayed the cost of including illustrations and an index.

We also wish to thank the individuals who contributed to the realization of this volume. First and foremost, we are grateful to the scholars whose work comprises this book, both for their expertise and patience. Anton Svynarenko provided much-needed support as our research assistant and translator. We thank Boris Wolfson, Editor of the series Cultural Revolutions: Russia in the Twentieth and Twenty-First Centuries, for believing in this project. We would also like to express our appreciation to Oleh Kotsyuba, Olga Livshin, Kira Nemirovsky, Faith Wilson Stein, and Ekaterina Yanduganova at Academic Studies Press for helping to move this project forward. We are profoundly indebted to the manuscript reviewers who offered invaluable feedback. Artist Misha Most graciously allowed us to use his painting *Love* (2017) for the book cover.

Finally, we would like to acknowledge the stimulating events that helped us develop our thinking about posthumanism: the ninth global conference "Visions of Humanity in Cyberculture, Cyberspace and Science Fiction," which took place at Mansfield College, Oxford University, in July 2014; and "All Things Living or Not: An Interdisciplinary Conference on Postanthropocentric Perspectives," held at Columbia University in February 2017. Last but certainly not least, we benefited from Bruno Latour's workshop "Political Ecology as Practice: A Regional Approach to the Anthropocene" at UIC in November 2017.
