

CONTENTS

<i>About the Book</i>	<i>xix</i>
<i>Preface</i>	<i>xxi</i>
Chapter 1: AutoCAD 3D Basics	1
1.1 Recognizing the 3D Environment	1
1.2 Looking to Your Model in the 3D Environment	2
1.2.1 Using Preset Views	2
1.2.2 Using ViewCube	4
Practice 1-1: AutoCAD 3D Basics	7
1.3 Orbiting in AutoCAD	8
1.3.1 Orbit Command	8
1.3.2 Free Orbit	9
1.3.3 Continuous Orbit	10
1.4 Steering Wheel	10
1.4.1 Zoom Command	11
1.4.2 Orbit Command	11
1.4.3 Pan Command	11
1.4.4 Rewind Command	11
1.4.5 Center Command	12
1.4.6 Look Command	12

1.4.7	Up/Down Command	12
1.4.8	Walk Command	12
1.5	Visual Styles	13
	Practice 1-2: Orbit, Steering Wheel, and Visual Styles	15
1.6	What Is the User Coordinate System (UCS)?	16
1.7	Creating a New UCS by Manipulating the UCS Icon	16
1.8	Creating a New UCS Using UCS Command	19
1.8.1	3-Point Option	19
1.8.2	Origin Option	20
1.8.3	X / Y / Z Options	20
1.8.4	Named Option	20
1.8.5	The Rest of the Options	22
1.8.6	UCS Icon	24
1.9	DUCS Command	26
1.10	Two Facts About UCS and DUCS	27
	Practice 1-3: User Coordinate System	28
	Chapter Review	30
	Chapter Review Answers	31
	 Chapter 2: Creating Solids	 33
2.1	Introduction to Solids	33
2.2	Creating Solids Using Basic Shapes	34
2.2.1	Box Command	34
2.2.2	Cylinder Command	35
2.2.3	Cone Command	36
2.2.4	Sphere Command	37
2.2.5	Pyramid Command	37
2.2.6	Wedge Command	38
2.2.7	Torus Command	39
2.3	Editing Basic Solid Shapes Using Grips	40

2.4	Editing Basic Solid Shapes Using Quick Properties and Properties	44
2.5	3D Object Snap	45
	Practice 2-1: Basic Solid Shapes and 3D Object Snap	48
2.6	Using Boolean Functions	49
2.6.1	Union Command	49
2.6.2	Subtract Command	50
2.6.3	Intersect Command	50
2.6.4	Solid History	50
2.7	Using the Presspull Command	52
	Practice 2-2: Boolean Functions and Presspull	56
2.8	Subobjects and Gizmo	58
2.8.1	Culling	59
2.8.2	Selection Cycling	60
2.8.3	Selecting Using Preset Views	62
2.8.4	Using Gizmo	63
	Practice 2-3: Subobjects and Gizmo	66
	Project 2-1-M: Mechanical Project Using Metric Units	68
	Project 2-1-I: Mechanical Project Using Imperial Units	69
	Project 2-2-M: Architectural Project Using Metric Units	70
	Project 2-2-I: Architectural Project Using Imperial Units	74
	Project 2-3-M: Mechanical Project Using Metric Units	79
	Project 2-3-I: Mechanical Project Using Imperial Units	80
	Chapter Review	82
	Chapter Review Answers	83
	 Chapter 3: Creating Meshes	 85
3.1	What Are Meshes?	85
3.2	Mesh Basic Shapes	86
3.3	Manipulating Meshes Using Subobjects and Gizmo	88

3.4	Increase/Decrease Mesh Smoothness	88
	Practice 3-1: Mesh Basic Objects, Subobjects, and Gizmo	90
3.5	Converting 2D Objects to Meshes	91
3.5.1	Revolved Surface Command	92
3.5.2	Edge Surface Command	93
3.5.3	Ruled Surface Command	94
3.5.4	Tabulated Surface Command	95
	Practice 3-2: Converting 2D Objects to Meshes	96
3.6	Converting, Refining, and Creasing	97
3.6.1	Converting Legacy Surfaces or Solids to Meshes	97
3.6.2	Refining Meshes	99
3.6.3	Add or Remove Crease	100
	Practice 3-3: Converting, Refining, and Creasing	102
3.7	Mesh Editing Commands	103
3.7.1	Split Mesh Face	103
3.7.2	Extrude Face	104
3.7.3	Merge Faces	105
3.7.4	Closing a Hole in a Mesh	106
3.7.5	Collapse a Face or Edge	107
3.7.6	Spin Triangular Face	108
	Practice 3-4: Mesh Editing Commands	110
	Project 3-1-M: Project Using Metric Units	112
	Project 3-1-I: Project Using Imperial Units	115
	Chapter Review	119
	Chapter Review Answers	120
	Chapter 4: Creating Surfaces	121
4.1	Introduction to Surfaces	121
4.2	Creating Planar Surface and Network Surface	122
4.2.1	Planar Surface	122
4.2.2	Network Surface	124

Practice 4-1: Creating Planar and Network Surfaces	125
4.3 Using Blend, Patch, and Offset Commands	126
4.3.1 Blend Command	126
4.3.2 Patch Command	128
4.3.3 Offset Command	130
Practice 4-2: Blend, Patch, and Offset Commands	132
4.4 How to Edit Surfaces	133
4.4.1 Fillet Command	133
4.4.2 Trim Command	134
4.4.3 Untrim Command	136
4.4.4 Extend Command	137
4.4.5 Sculpt Command	139
4.4.6 Editing Surfaces Using the Grips	139
Practice 4-3: How to Edit Surfaces	142
Practice 4-4: Fillet and Grips Editing	144
4.5 Project Geometry	145
4.5.1 Using Project to UCS	145
4.5.2 Using Project to View	146
4.5.3 Using Project to 2 Points	147
Practice 4-5: Project Geometry	148
4.6 Creating NURBS Surfaces	149
Practice 4-6: NURBS Creation and Editing	159
Chapter Review	162
Chapter Review Answers	164
 Chapter 5: Creating Complex Solids and Surfaces	 165
5.1 Introduction	165
5.2 3D Polyline as a Path	166
5.3 Helix as a Path	167
5.3.1 Axis Endpoint Option	168
5.3.2 Turns Option	168

5.3.3	Turn Height Option	168
5.3.4	Editing Helix Using Grips	168
Practice 5-1:	Drawing 3D Polyline and Helix	170
5.4	Using Extrude Command	171
5.4.1	Create an Extrusion Using Height	172
5.4.2	Create an Extrusion Using Direction	172
5.4.3	Create an Extrusion Using Path	173
5.4.4	Create an Extrusion Using Taper Angle	174
Practice 5-2:	Using Extrude Command	175
5.5	Using Loft Command	177
5.5.1	Lofting Using Guides	179
5.5.2	Lofting Using Path	180
5.5.3	Lofting Using Cross Sections Only	180
Practice 5-3:	Using Loft Command	183
5.6	Using Revolve Command	184
Practice 5-4:	Using Revolve Command	186
5.7	Using Sweep Command	187
5.7.1	Alignment Option	188
5.7.2	Base Point Option	190
5.7.3	Scale Option	190
5.7.4	Twist Option	191
Practice 5-5A:	Using Sweep Command	192
Practice 5-5B:	Using Sweep Command	193
5.8	Editing Solid and Surfaces Using the Four Commands	194
5.8.1	Using Grips	194
5.8.2	Using Quick Properties	195
5.8.3	Using Properties	196
5.9	DELOBJ System Variable	197
Project 5-1-M:	Project Using Metric Units	198
Project 5-1-I:	Project Using Imperial Units	201

Chapter Review	205
Chapter Review Answers	206
 Chapter 6: Solid Editing Commands	 207
6.1 Introduction	207
6.2 Extruding Solid Faces	209
6.3 Tapering Solid Faces	210
Practice 6-1: Extruding and Tapering Solid Faces	212
6.4 Moving Solid Faces	213
6.5 Copying Solid Faces	214
Practice 6-2: Moving and Copying Solid Faces	215
6.6 Offsetting Solid Faces	216
6.7 Deleting Solid Faces	217
Practice 6-3: Offsetting and Deleting Solid Faces	219
6.8 Rotating Solid Faces	220
6.9 Coloring Solid Faces	222
Practice 6-4: Rotating and Coloring Solid Faces	223
6.10 Extracting Solid Edges	224
6.11 Extract Isolines	225
6.12 Imprinting Solids	226
6.13 Coloring Solid Edges	227
6.14 Copying Solid Edges	228
6.15 Offsetting Solid Edges	229
Practice 6-5: All Solid Edges Functions	231
6.16 Separating Solids	233
6.17 Shelling Solids	234
Practice 6-6: Separating and Shelling Solid	236

6.18 Finding Interference Between Solids	237
Practice 6-7: Finding Interference Between Solids	240
Chapter Review	242
Chapter Review Answers	243
 Chapter 7: 3D Modifying Commands	 245
7.1 3D Move, 3D Rotate, and 3D Scale and Subobjects and Gizmo	245
7.1.1 3D Move Command	246
7.1.2 3D Rotate Command	246
7.1.3 3D Scale Command	247
7.2 Mirroring in 3D	247
7.2.1 XY, YZ, and ZX Options	248
7.2.2 3 Points Option	248
7.2.3 Last Option	248
7.2.4 Object, Z-axis, View Options	248
Practice 7-1: Mirroring in 3D	249
7.3 Arraying in 3D	250
Practice 7-2: Arraying in 3D	252
7.4 Aligning Objects in 3D	253
7.5 Filletting Solid Edges	254
7.5.1 Chain Option	255
7.5.2 Loop Option	256
7.6 Chamfering Solid Edges	257
Practice 7-3: Aligning, Filletting, and Chamfering	259
Project 7-1-M: Project Using Metric Units	261
Project 7-1-I: Project Using Imperial Units	267
Chapter Review	274
Chapter Review Answers	275

Chapter 8: Converting and Sectioning	277
8.1 Introduction to Converting 3D Objects	277
8.2 Converting 2D and 3D Objects to Solids	278
8.2.1 Thicken Command	278
8.2.2 Convert to Solid Command	279
8.3 Converting 2D and 3D Objects to Surfaces	281
8.3.1 Convert to Surface Command	282
8.3.2 Explode Command	283
8.4 Conversion Between Objects—Conclusion	284
Practice 8-1: Converting Objects	285
8.5 Introduction to Sectioning in 3D	286
8.6 Sectioning Using the Slice Command	286
Practice 8-2: Slicing Objects	287
8.7 Sectioning Using the Section Plane Command	288
8.7.1 Select a Face Method	288
8.7.2 Draw Section Option	289
8.7.3 Orthographic Option	289
8.7.4 Type Option	290
8.7.5 Section Plane Type Options	290
8.7.6 Section Plane Grips	293
8.7.7 Adding Jog to an Existing Section Plane	294
8.7.8 Live Section Command	295
8.7.9 Generate Section Command	297
Practice 8-3: Using Section Plane Command	301
8.8 Sectioning Using the Flatshot Command	303
Practice 8-4: Using the Flatshot Command	305
Chapter Review	307
Chapter Review Answers	308

Chapter 9: Printing in 3D and 3D DWF	309
9.1 Named Views and 3D	309
9.2 3D and Viewport Creation	312
Practice 9-1: View and Viewport with 3D	315
9.3 Model Documentation—Introduction	317
9.4 Model Documentation—Create Base View	317
9.5 Model Documentation—Create Projected View	320
9.6 Model Documentation—Create Section View	321
9.7 Model Documentation—Section View Style	324
9.7.1 Identifier and Arrows Tab	326
9.7.2 Cutting Plane Tab	327
9.7.3 View Label Tab	328
9.7.4 Hatch Tab	328
9.8 Model Documentation—Create Detail View	329
9.9 Model Documentation—Detail View Style	330
9.9.1 Identifier Tab	332
9.9.2 Detail Boundary Tab	332
9.9.3 View Label Tab	333
9.10 Model Documentation—Editing View	334
9.11 Model Documentation—Editing Components	336
9.12 Model Documentation—Updating Views	337
9.13 Model Documentation—Drafting Standards	338
9.14 Model Documentation—Annotation Monitor	339
Practice 9-2: Model Documentation	342
9.15 3D DWF Creation and Viewing	345
9.15.1 3D DWF Command	345
9.15.2 Batch Plot Command	346
9.15.3 Move and Rotate Commands	349
9.15.4 Sectioning	350
9.15.5 Taking a Snapshot	351

Practice 9-3: Producing and Viewing 3D DWF	353
Chapter Review	355
Chapter Review Answers	356
 Chapter 10: Cameras and Lights	 357
10.1 Introduction	357
10.2 How to Create a Camera	357
10.3 How to Control a Camera	359
10.3.1 Camera Preview Dialog Box	359
10.3.2 Grips	360
10.3.3 Front and Back Clipping Planes	361
10.3.4 Camera Display and Camera Tool Palette	362
Practice 10-1: Creating and Controlling Cameras	363
10.4 Introducing Lights	364
10.5 Inserting Point Light	365
10.5.1 Name	365
10.5.2 Intensity Factor	366
10.5.3 Status	366
10.5.4 Photometry	366
10.5.5 Shadow	367
10.5.6 Attenuation	367
10.5.7 Filter Color	368
10.5.8 Exit	368
10.5.9 Target Point Light	368
10.6 Inserting Spot Light	368
10.6.1 Hotspot Option	369
10.6.2 Falloff Option	370
10.7 Inserting Distant Light	370
10.8 Dealing with Sunlight	371

10.9 Inserting Web Light	373
10.9.1 Web Option	374
10.10 Editing Lights	376
10.11 Dealing with Premade Lights	377
10.12 What Is “Lights in Model”?	377
Practice 10-2: Creating and Controlling Lights	380
Chapter Review	382
Chapter Review Answers	383
 Chapter 11: Material, Rendering, Visual Style, and Animation	 385
11.1 Introducing Materials in AutoCAD	385
11.2 Material Browser	386
11.3 Methods to Assign Material to Objects and Faces	387
11.3.1 Using Drag-and-Drop	388
11.3.2 After Selecting an Object, Right-Click Material	388
11.3.3 Using Attach by Layer Command	388
11.3.4 Removing Assigned Materials	389
11.4 Material Mapping	390
11.4.1 Planar Mapping	390
11.4.2 Box Mapping	392
11.4.3 Cylindrical and Spherical Mapping	393
11.4.4 Copying and Resetting Mapping	393
Practice 11-1: Dealing with Materials	394
11.5 Create New Material Library and Category	396
11.6 Create Your Own Material	397
11.6.1 Reflectivity	401
11.6.2 Transparency	401
11.6.3 Cutouts	402
11.6.4 Self-Illumination	402

11.6.5 Bump	402
11.6.6 Tint	403
Practice 11-2: Creating Your Own Material	404
11.7 Render in AutoCAD	406
11.7.1 Render Preset	408
11.7.2 Render Duration	409
11.7.3 Lights and Materials	409
11.8 Render Environment and Exposure	410
11.8.1 Environment	410
11.8.2 Exposure	412
11.8.3 Render Window	412
Practice 11-3: Dealing with Rendering	413
11.9 What Visual Style Is and How to Create It?	414
11.9.1 Face Settings	416
11.9.2 Lighting	417
11.9.3 Environment Settings	418
11.9.4 Edge Settings	418
Practice 11-4: Creating Visual Styles	421
11.10 Animation	422
Practice 11-5: Creating Animation	424
Chapter Review	426
Chapter Review Answers	427
Index	429
