

CONTENTS

<i>Preface</i>	xv
Chapter 1 Remote Sensing in Oceanography	1
1.1 Introduction to Remote Sensing.....	1
1.1.1 Satellite Images vs. Maps	2
1.1.2 Remote Sensing vs. GIS	3
1.1.3 Remote Sensing vs. Aerial Photography/ Photogrammetry	3
1.1.4 Remote Sensing vs. Sonar	4
1.1.5 Applications of Remote Sensing.....	5
1.1.6 Applications of Remote Sensing in Oceanography.....	8
1.1.7 Oceanography.....	14
1.2 Radar in Remote Sensing.....	15
1.2.1 Synthetic Aperture Radar (SAR)	16
1.2.2 NADIR Radar System	17
1.3 Radiometer in Remote Sensing.....	20
1.3.1 Microwave Radiometer.....	21
1.3.2 Infrared Radiometers	22
1.3.3 Imaging Radiometer.....	23
1.4 Satellite in Remote Sensing	23
1.4.1 Microwave Measurement of Ocean Wind	24
1.4.2 Wind and Wave Height Measurements.....	28
1.5 Sonar in Remote Sensing.....	28
1.5.1 Mapping the Ocean Floor with Single Beam Echo Sounding.....	29
1.5.2 Multi-Beam Bathymetry	30
1.5.3 Sound as Underwater Navigation	30
1.5.4 Echo-Sounders	31

1.6 Telemetry in Remote Sensing	34
1.6.1 Applications of Telemetry	35
1.7 Laser and LIDAR in Remote Sensing	37
1.7.1 Data Collection in LIDAR.....	37
1.7.2 Discrete-Return LIDAR and Waveform Recording Devices	39
1.7.3 Applications of LIDAR Remote Sensing.....	42
1.8 Oceanographic and Atmospheric Remote Sensing Research	44
Exercises	45

Chapter 2 Sensors and Their Measurements for Ocean Monitoring.....

2.1 Introduction to Sensors	49
2.1.1 History of Sensors	51
2.2 Scanner Sensor Systems	53
2.2.1 Spatial Resolution, Pixel Size, and Scale	55
2.2.2 Spectral/Radiometric Resolution	57
2.2.3 Temporal Resolution	59
2.2.4 Sensor Design and Selection	60
2.3 Weather Satellites/Sensors	60
2.4 Synthetic Aperture Radar Sensors	62
2.5 Marine Observation Satellites (MOS) Sensors.....	62
2.6 Micro Sensors for Monitoring Ocean Acidification	65
2.7 Measurements of Ocean Monitoring Parameters	66
2.7.1 Ocean Color.....	67
2.7.2 Sediment Monitoring Methods	76
2.7.3 Surface Currents	80
2.7.4 Surface Wind and Waves	81
2.7.5 Wave Height and Wind Speed	82
2.7.6 Sea Surface Temperature.....	83
2.7.7 Upwelling.....	90
2.7.8 Sampling	91
2.7.9 Wave Power	91
2.7.10 Ocean Floor	91
2.8 Research on Ocean Phenomena.....	93
Exercises	93

Chapter 3 Underwater Acoustics	97
3.1 Interaction of Sound with Seafloor	97
3.1.1 Underwater Acoustics	98
3.1.2 The Features of Sound Waves	99
3.2 Transmission of Data Underwater Using Sound	100
3.3 Measurement of the Upper Ocean	103
3.3.1 Wave Height Measurement	104
3.3.2 Wave Velocities Measurement	104
3.3.3 Bubbles Study	105
3.3.4 Measurement of Water Depth	106
3.4 Locating Fish	106
3.4.1 Identifying Fish	108
3.4.2 Communicating Underwater	110
3.5 Measurement of Ocean Temperature	111
3.5.1 Acoustic Tomography	111
3.5.2 Inverted Echo-Sounders	112
3.5.3 Measuring Global Climate Change	113
3.6 Measurement of Ocean Currents	116
3.6.1 Acoustic Doppler Current Profiler	116
3.6.2 RAFOS Floats	117
3.6.3 Reciprocal Transmission	117
3.6.4 Measuring Waves in the Surf Zone	118
3.6.5 Sound Use to Make Long-Term Measurements of the Ocean	119
3.7 Sound Use to Study the Earth's History	120
Exercises	123
 Chapter 4 Underwater Communication	 125
4.1 Underwater Wireless Communication	125
4.1.1 Environment/Propagation Medium	126
4.2 Fundamentals of Waves	126
4.2.1 Acoustic Waves and Physical Properties	126
4.2.2 Acoustic Communication	127
4.2.3 Optical Waves	128
4.2.4 Optical Communication	128
4.3 Underwater Acoustic Communication	130
4.3.1 Limitations of Underwater Acoustic Communication	130

4.4 Underwater Optical Communications	131
4.4.1 Using Laser as Optical Communication Above Water and Underwater	132
4.5 Underwater Laser Sensor Architecture.....	134
4.5.1 Protocol Stack for the Underwater Laser Sensor Network	134
4.5.2 Wireless Laser Communication System Description	136
4.6 Instrumentation System Devices	138
4.6.1 MEMS Approach	138
4.7 Underwater Mobile Communication	139
4.7.1 Benefits of Smart Optical Systems for Underwater Vehicles	139
4.7.2 Systems and Methods in Underwater Optical Communication.....	141
4.8 Types of Modulation.....	144
4.8.1 Frequency Shift Keying as Applied to UAC	144
4.8.2 Direct Sequence Spread Spectrum (DSSS).....	145
4.8.3 Multicarrier Modulation	146
4.8.4 Multi-Input Multi-Output Techniques.....	147
4.9 Internet to Ships Using Oceanographic Tool (SeaNet).....	148
4.9.1 Global Positioning System (GPS) in Ship	149
4.9.2 Internet Access for Voyagers	151
4.9.3 Voice Communication on Ship	154
4.9.4 Submarine Communications Cable	155
4.9.5 Optical Submarine Cable Repeaters.....	155
4.9.6 Antarctica	156
4.9.7 Perfectly Secure Communication	156
4.9.8 Environmental Impact.....	161
Exercises	161
Chapter 5 Oceanographic Wireless Sensor Networks.....	165
5.1 Introduction to Wireless Sensor Networks	165
5.1.1 Terrestrial vs. Oceanographic WSNs.....	166
5.2 Oceanographic WSNs.....	167
5.2.1 Application Areas of Oceanographic WSN	169

5.2.2	Common WSN Architecture	169
5.2.3	General Sensor Node	170
5.2.4	Sensing Parameters and Sensors	172
5.2.5	Challenges in Oceanographic WSN	172
5.3	Wireless Communication Technologies	174
5.3.1	Oceanographic Sensors Protection	177
5.3.2	Advanced Buoy Design.....	177
5.3.3	Energy Harvesting System Design	178
5.3.4	System Stability and Reliability	179
5.4	Wireless Underwater Sensor Network	180
5.4.1	Underwater Sensing Applications.....	181
5.5	Underwater Communications and Networking Technology.....	184
5.5.1	Physical Layer.....	184
5.5.2	Medium Access Control and Resource Sharing.....	186
5.5.3	Network Layer, Routing, and Transport.....	189
5.5.4	Network Services	189
5.5.5	Sensing and Application Techniques.....	190
5.5.6	Hardware Platforms	191
5.5.7	Test Beds, Simulators, and Models	191
5.6	Wireless Underwater Acoustic Sensor Network	192
5.6.1	Underwater Acoustic Sensor Network vs. Terrestrial Network	194
5.6.2	Unique Characteristics of Underwater Acoustic Sensor Network	194
5.6.3	Underwater Acoustic Sensor Network Architecture.....	195
5.6.4	Two-Dimensional Underwater Sensor Network Architecture.....	195
5.6.5	Three-Dimensional Underwater Sensor Network Architecture.....	197
5.6.6	Sensor Networks Architecture with AUVs.....	198
5.7	Networking Challenges for Underwater Acoustic Sensor Networks	199
5.7.1	Research Challenges and Opportunities	201
	Exercises	202

Chapter 6	Image Processing for the Ocean	205
6.1	Analog and Digital Images	205
6.2	The Electromagnetic Spectrum	206
6.2.1	A Push Broom Scanner	207
6.3	Multi-layer Image	208
6.3.1	Interaction Mechanisms	209
6.4	Spectral Response Patterns	209
6.5	Multi-spectral Image	212
6.5.1	Multi-Spectral Remote Sensing	212
6.5.2	Superspectral Image	213
6.6	Hyperspectral Image	213
6.6.1	Hyperspectral Remote Sensing	214
6.7	Sensor/Platform Systems	214
6.7.1	Aerial Photography	215
6.7.2	Aerial Videography	215
6.7.3	Satellite-Based Scanning Systems	216
6.8	Spatial Resolution	217
6.8.1	Spatial Resolution and Pixel Size	218
6.9	Radiometric Resolution	220
6.9.1	Data Volume	220
6.10	Infrared Remote Sensing	223
6.10.1	Black Body Radiation	224
6.11	Microwave Remote Sensing	225
6.11.1	Interaction between Microwaves and Earth's Surface	227
6.12	Digital Image Processing	228
6.12.1	Image Preprocessing	228
6.12.2	Image Enhancement	230
6.12.3	Image Classification	236
6.12.4	Image Transformation	241
6.13	Software for Ocean Color Data	243
	Software for Ocean-color Algorithms	246
	Remote Sensing Software	246
	Exercises	247
Chapter 7	Ocean Energy	251
7.1	Ocean Energy as a Renewable Source of Energy	251
7.2	Wave Energy	254
7.2.1	Ocean Wave Energy Technologies	257

7.3	Tidal Power	260
7.3.1	Tidal Barrage Operation	260
7.4	Ocean Thermal Energy Conversion (OTEC)	261
7.5	Ocean Turbine Operation	261
7.6	Ocean Current Energy	263
7.7	Offshore Wind Energy	264
7.7.1	Offshore Wind Energy Technology.....	264
7.7.2	Semi-Submersible Offshore Wind Turbine	267
7.7.3	Offshore Floating Structures for Mounting Wind Turbines	267
7.7.4	Transmitting Power Ashore through Subsea Cables	270
7.8	Offshore Solar Energy	270
7.8.1	Solar Energy Technologies.....	271
7.8.2	Challenges in Ocean Power Technologies	274
	Exercises	274
Chapter 8	Marine Electronics.....	277
8.1	The Role of Electronics in the Marine Generator Set.....	277
8.1.1	Engine Governor	280
8.1.2	Timing Considerations.....	281
8.1.3	Fuel Injection	283
8.2	Marine Instruments	286
8.2.1	Wireless Control Stations.....	289
8.2.2	Salt Assault	290
8.2.3	Producing Nautical Charts.....	291
8.3	Marine Navigation Equipment.....	292
8.3.1	GPS-Based Instrument Recovery Stray Line Buoys ...	292
8.3.2	Weather Monitoring Systems	295
8.3.3	Routing and Reporting	295
8.4	Integrated Sailboat Instruments	296
8.5	Autopilot System.....	297
8.6	Satellite Phones and Their Use on Ship	299
8.7	Firefighting Equipment.....	302
8.8	Shipboard Level Sensors	302
8.8.1	Pressure-Based Level Measurement.....	304
8.8.2	Bubbler Gauge.....	304
8.8.3	Ultrasonic/Microwave Level Sensor.....	305
8.8.4	Capacitive Level Sensor.....	306

8.9 Ship's Bridge.....	306
8.9.1 Controlling Ship's Speed and Direction from Bridge	307
8.10 Tracking Ships Using AIS	308
8.10.1 AIS Operation.....	309
8.10.2 Information Transfer	310
8.11 Electrical Propulsion System	310
8.11.1 Boil-Off for Propulsion	311
8.11.2 TFDE Propulsion Layout	311
8.12 Gas Detection Meters for Ships	315
8.12.1 Combustible Gas Indicators or Explosimeters	315
8.12.2 Tankscope or Noncombustible Gas Indicator	316
8.12.3 Multi-Gas Analyzers	316
Exercises	317
Chapter 9 Oceanographic Instruments	321
9.1 Instruments and Their Measured Parameters	321
9.1.1 Depth.....	322
9.1.2 Temperature	322
9.1.3 Salinity	324
9.1.4 Oxygen, Phosphate, Silicate, Nitrate, pH	324
9.1.5 Water Clarity	325
9.1.6 Sound.....	325
9.1.7 Currents	327
9.1.8 Waves and Tides.....	330
9.1.9 Seabed Sampling.....	330
9.1.10 Bioluminescence	331
9.2 Oceanographic Instrumentation.....	332
9.2.1 Research Vessels	333
9.2.2 Moorings	333
9.2.3 Moored Profiler	335
9.2.4 Satellites	337
9.2.5 Submersibles	337
9.2.6 Towed Vehicles	338
9.2.7 Floats and Drifters	339
9.3 Measurements of Hydrographic Properties.....	342
9.3.1 Reversing Thermometers.....	342
9.3.2 CTDs	344

9.3.3 Multiple Water Sample Devices	344
9.3.4 Thermosalinographs	345
9.3.5 Remote Sensors	345
9.4 Measurements of Dynamic Properties	346
9.4.1 Current Meters	346
9.4.2 Wave Measurements	351
9.4.3 Tide Gauges	351
9.4.4 Remote Sensors	353
9.4.5 Shear Probes	353
9.4.6 Ferry Box	354
9.4.7 Glider	355
9.5 Radar Doppler Current Profiler (RDCP)	355
9.5.1 X Band Radar	356
9.5.2 HF Radar	356
9.6 Satellite Remote Sensing	357
9.7 Underwater Nodes	357
9.8 Zooplankton Recorder	358
9.8.1 Nucleic Acid Biosensor	359
9.8.2 Sensors for pH and Alkalinity	359
9.9 Air Sea Interaction Meteorology (ASIMET)	360
9.10 BIOMAPER	362
9.11 Gravity Corer	365
9.11.1 Hydraulically Damped Gravity Corer	366
9.12 Marine Magnetometer	367
9.13 Ocean-Bottom Seismometer	369
9.14 Submersible Incubation Device	371
9.15 Deep Ocean Tsunami Detection Buoy	373
9.16 Oceanographic Instruments	374
Exercises	376
Chapter 10 Ocean Optics and Ocean Facts	379
10.1 Introduction to Optical Properties of the Ocean	379
10.1.1 Optical Constituents of Seawater	380
10.1.2 Inherent Optical Properties (IOP) Variability	385
10.2 Retrieval of Oceanic Constituents from	
Ocean Color Measurements	390
10.2.1 Retrieval of Oceanic Constituents from	
Ocean Color at TOA	392
10.2.2 The Atmospheric Correction Problem	392

10.3 Ocean Optics Dip Probe Spectrometers	394
10.3.1 Spectrometers	396
10.3.2 Ocean Optics Visible Spectrophotometer.....	398
10.4 Interesting Facts about the Ocean	399
Exercises	413
 Appendix I Indian Satellites for Ocean Monitoring.....	415
 Appendix II U.S. OCEAN MONITORING	443
 Appendix III Using Satellites for Forecasting (U.S.).....	445
 Appendix IV Exploring The Ocean Basins With Satellite Altimeter Data	449
 Appendix V Acronyms	457
 <i>Index.....</i>	459
