

Frank Farley and the Birds of Alberta

“In this remarkable biography Hvenegaard, Mouat, and Marshall team up brilliantly to give Frank Farley the recognition his legacy deserves, all the while unpacking a fascinating tale of conservation, settler, Indigenous, academic, and environmental history. This is a compassionate but balanced account of a complex individual living in complicated times. Anyone interested in our province or our environment will find this a fascinating read.”

—JOHN ACORN, Canadian naturalist and author

“*Frank Farley and the Birds of Alberta* sheds light on a leading naturalist and his network of ornithologists and birders during a transformative moment in Alberta history.”

—JOANNA DEAN, Carleton University

“This book is an in-depth study of amateur ornithologist Frank Farley and his social environment, set against the changing backdrop of environmental activism and ecological knowledge during the first half of the 20th century.”

—ERIC MILLS, Dalhousie University

“This well-researched book is successful in establishing Farley as a significant figure in early Canadian ornithology and as a significant naturalist of his time.”

—JAMES MURTON, Nipissing University
